Uses Most

Energy
223

kWh/year (kilowatt-hour per year) is a measure of energy (electricity) use.
Your utility company uses it to compute your bill. Only Compact size clothes washers
are used in this scale.

Clothes washers using more energy cost more to operate.
This model's estimated yearly operating costs is:

\$23

When used with an electric water heater when used with a natural water heater
Based on eight loads of clothes a week and a 2004 U.S. Government national average
cost of 8.60 ¢ per kWh for electricity and 91.0 ¢ per therm for natural gas. Your actual
operating cost will vary depending on your local utility rates and your use of the product.

\$11
