

As efficient as it is quiet

2007 Dishwashers

BOSCH

Invented for life

Reasons to buy Bosch.

Bosch dishwashers, like all of our products, deliver on their promises time and again. So when we say they are the quietest on the market, they really are. And thanks to Bosch's tireless engineering, use of only the highest-quality components, and an unwavering commitment to the environment, you can bring your customers the most efficient line of dishwashers in the U.S. that also lead the category in safety. Offer your customers everything they want in a dishwasher.

Quality

Our use of the highest-quality components and exceptional construction ensures your customers are getting a dishwasher of unrivalled quality, durability and reliability. With its powerful features, efficient operation, and 100% quality testing before shipping, every Bosch dishwasher promises years of worry-free operation.

Quietness

Bosch dishwashers are the quietest. A suspended two-pump motor system reduces vibrations and noise. Heavy-duty bitumen coated metal and cotton-fiber sheet insulation dampen sound to create a decibel level no louder than raindrops. Bosch's dishwashers are as discrete as they are powerful.

Efficiency

Bosch ENERGY STAR® qualified dishwashers offer you class-leading efficiency thanks to cutting-edge technology and our commitment to the environment. Our **ECOSENSE™** Wash Management System selects the best temperature and water level that saves up to 20% on energy usage. Add to that an efficiency-boosting flow-through water heater and condensation drying method, and you have an unprecedented package of cleaning performance and energy efficiency.

Safety

Bosch's exclusive **AQUASTOP®** leak protection system detects any unlikely leaks in the solid molded base of the dishwasher, shuts down operation and automatically pumps out water before it has a chance to reach the floor. And the **CHILDLOCK** feature limits unwanted access by children, while allowing easy access for adults.

Innovation comes standard.

Bosch is more than an appliances manufacturer. We are an innovator. So our dishwashers improve customers' lives every day with features that protect the environment, and bring convenience to a whole new level. These include Half Load option, a specially designed silverware basket that's 25% larger, and space-efficient racks. Built to satisfy the widest range of customers, maybe that's why J.D. Power and Associates ranked Bosch "Highest in Customer Satisfaction with Dishwashers."

ECOOPTION™

This cutting-edge feature adjusts water temperature and cycle length for optimal efficiency, allowing you to reduce energy usage by up to 25% with just the push of a button.

Condensation Drying

Built with a solid stainless steel tub, Bosch dishwashers utilize condensation drying to save you money on your energy bills. Condensation drying works by heating the dishes with hot water from the final rinse. Moisture condenses on the cool stainless steel tub and is drained, so your clean dishes dry without an energy-wasting active drying element.

RACKMATIC®

Customers can raise or lower the upper rack to easily accommodate oversized or oddly shaped dishes. With the touch of a lever they can create up to 14" of space on the bottom, or 10" on the top.

Bosch received the highest numerical score with Dishwashers in the proprietary J.D. Power and Associates 2006 Major Home Appliance StudySM Study based on 12,656 total responses measuring 11 brands and measures opinions of consumers during the previous 24 months. Proprietary study results are based on experiences and perceptions of consumers surveyed in July and September 2006. Your experiences may vary. Visit jdpower.com.
