Cleanup by Encore.

ASKO

Oftentimes, because of the effort involved, people hesitate to entertain. And if they do host a party, the enjoyment of the evening is tempered by the cleanup. But that's about to change. With the introduction of its new Encore dishwasher, ASKO's goal was not only to help you live the good life, but to enjoy more of it. All to make you, the host, feel more like a guest.

INTRODUCING THE ENCORE DISHWASHER BY ASKO

Never again will you need to handwash your dishes. Or your crystal. Or your fine china. Or your large pans. Or your stockpots. Or anything else. Ever. Working as a companion to the ASKO D3531XL dishwasher, the Encore dishwasher handles all the items that used to require handwashing. In other words, at the end of the evening, cleanup consists of loading and running the dishwashers. No rinsing. No handwashing. No worries. So when it comes to hosting your next gathering, you can kick back, have fun and enjoy the evening – all the way through the Encore.

A STANDING OVATION FOR THE END OF HANDWASHING

ANOTHER INNOVATIVE PRODUCT FROM ASKO.

Thanks to its extra large interior capacity, its new, specialized FlexiRacks™ rack system and unique washing programs, the innovative Encore can handle any type of load. First, the tall interior and repositioned lower spray mechanism are ideal for cleaning extra large items. Second, the FlexiRack system allows you to configure numerous wash rack options for the variety of items you need to wash. This adaptability means that you can wash practically any item in your kitchen, but also that you can install another Encore in your entertainment area with both racks configured to handle your specialty glassware. Finally, the Encore has specialized cleaning cycles pre-programmed to wash those items normally reserved for handwashing. These innovations are the ultimate in dishwashing technology, allowing you to wash all your large cookware, serving dishes, utensils, dinnerware and delicate glassware in any combination.

PERFORMANCE THAT STARTS WHERE OTHERS STOP.

The ASKO Encore is meticulously constructed for commercial-grade performance using stainless steel components wherever possible. This commitment to quality is backed up by the ASKO 3-year full warranty, the industry's longest – not that you'll ever need it. After all, ASKO dishwashers are built to last 20 years.

As a testament to ASKO's uncompromising Swedish workmanship, the company has earned a number of prestigious awards for design and performance, including "Best Overall Dishwasher," from leading consumer reporting publications.

LIFE MADE EASY.

Entertaining has never been so easy. Cleanup has never been so easy. Living the good life has never been so easy. But, with Encore, the ease doesn't stop there.

Easy on the eyes. The Encore features a hidden control panel for sleek design, and the exterior is available in stainless steel or you can have a custom door made to match your cabinetry.

Easy on the ears. The ASKO Encore is super-quiet. The quietest dishwasher available. Period.

Easy on the Earth. ASKO dishwashers consume less electricity than any other full-size model, including other EnergyStar® units. Better still, the average load in an ASKO dishwasher uses less than 5 gallons of water, compared to up to 10 gallons in a typical dishwasher. In just one year, that saves more than 1,000 gallons. And using about half the detergent of other dishwashers, washing a load in an ASKO dishwasher is less expensive than doing it by hand.

Encore Specifications

Contemporary Styling and Controls

- Hidden Controls
- Styles: Stainless Steel with handle
- Fully Integrated

Unique, Flexible Wash System

- Self-Cleaning Triple Filtration System
- Patented PowerZones™ (2)
- Separate Circulation and Drain Pumps
