

LIEBHERR

Use and Care Manual

Outdoor Cooler

RO 500
7081 457-00

Congratulations on your purchase. Choosing this appliance means you want all the benefits of state-of-the-art refrigeration technology, guaranteeing you top quality, a long appliance life-span and excellent reliability.

The features on your appliance have been designed to ensure maximum convenience - day in, day out.

This appliance has been manufactured with recyclable materials using an environmentally friendly process, so together we're making an active contribution to the preservation of our environment.

To get to know all the benefits of your new appliance, please read the information contained in these operating instructions carefully.

We know you will be pleased with your new appliance.

Additional benefits

- CFC-free
- Energy-optimized refrigerant circuit
- Energy-efficient insulation
- Low energy consumption
- User-friendly electronic controls
- Display of functions switched on
- Temperature can be controlled within climate rating range, regardless of room temperature
- Big capacity
- Variable and practical features
- Audible door open alarm
- Easy to clean
- Door hinges can be changed over

IMPORTANT

All types and models are subject to continuous improvement. The manufacturer reserves the right to make modifications in the shape, equipment and technology.

SAFETY

Read and follow all the safety rules and operating instructions before using this appliance. Save these instructions for future reference. Throughout this instruction manual are specific Important instructions, Cautions and Warnings.

DANGER

Danger indicates a hazard which cause serious injury or death if precautions are not followed.

WARNING

Warning indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION

Caution indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

IMPORTANT

This highlights information that is especially relevant to a problem-free installation.

Disposal of Old Appliance

Be sure to follow your local requirements for disposal of appliances. Discarded appliances can be dangerous.

DANGER

Risk of child entrapment. Before you discard old appliances:

- Be sure to follow your local requirements for disposal of appliances. Discarded appliances can be dangerous.
- Remove the doors.
- Leave the shelves in place so that children may not easily climb inside.
- Cut off the prongs from the power cable plug and discard them.
- Cut off the power cable from the discarded refrigerator. Discard separately from the refrigerator.

Following these instructions reduces the possibility of causing personal injury, especially to children playing.

Contact the trash collection agency in your area for additional information.

Important Safety Information

This appliance is intended for domestic use only. Use the appliance only for its intended purpose - the storage of food products. Follow the cautions and safety warnings throughout this instruction manual including the following:

- To prevent injury to you or damage to the unit, the appliance should be unpacked and set up by two people.
- If the appliance is damaged on delivery, contact the supplier immediately before connecting to the power source.
- To guarantee safe operation, ensure that appliance is set up and connected as described in these operating instructions.
- Disconnect the appliance from the power source if a fault occurs. Pull out the plug, turn off or disable the power source.
- When disconnecting the appliance, use the plug. Do not pull on the cable.
- Any repairs and work on the appliance should only be performed by the customer service department. Unauthorized work may be dangerous to the user. Changing the power source cable should only be done by the customer service department.
- Do not store explosives or sprays using combustible propellants such as butane, propane, pentane in the appliance. Electrical components might cause leaking gas to ignite. You may identify such sprays by the printed contents or a flame symbol.
- Do not use electrical appliances inside the appliance.
- Do not allow children to play with the appliance. Children must not climb, sit or stand on the racks or door.
- To prevent possible injury due to an electrical shock, be sure to disconnect the power cord or turn off the circuit breaker before replacing the interior light or cleaning the appliance.
- To prevent possible injury due to broken glass, use hand protection when replacing the interior light.

- To avoid injury or damage to the appliance, do not use steam cleaning equipment to clean the appliance.
- Do not operate the appliance in the presence of explosive fumes.
- In the event of a power outage, minimize opening the door.
- To protect the appliance from possible damage, allow the appliance to stand 1/2 to 1 hour in place before turning the electricity on. This allows the refrigerant and system lubrication to reach equilibrium.

Electrical Safety

Connect this appliance to a 110-120 VAC, 15 amp circuit that is controlled by a circuit breaker or fuse. This appliance should have its own separate grounded circuit. Do not use an extension cord.

The power cord is equipped with a three-prong (grounding) plug for your protection against possible shock hazards. To maintain this protection:

- Do not modify the plug by removing the round grounding prong.
- Do not use a two-prong adapter. Where a two-prong wall receptacle is encountered, contact a qualified electrician and have it replaced with a three-prong receptacle in accordance with all local codes and ordinances.
- Do not use a power cord that is frayed or damaged.
- To prevent the appliance from being turned off accidentally, do not plug the appliance into an outlet controlled by a wall switch.

UNPACKING

Safety Instructions and Warnings

CAUTION

To avoid risk of personal injury or property damage, have two people unpack and move this appliance into place.

CAUTION

Protect the finished floor surface before you uncrate the appliance.

Avoid placing the appliance in direct sunlight or near the stove, range top, radiators and similar heat sources.

The floor under the appliance should be flat and level.

The appliance is intended for out door use. It is recommended to install the appliance in a sheltered area, avoiding direct contact with extreme weather.

The ventilation grille should not be obstructed. Always ensure there is good ventilation in front of the appliance.

As soon as you uncrate the appliance:

- Examine the appliance and packaging for shipping damage. Contact the carrier immediately if you suspect there is any damage.
- Note the type (model number), index, serial number, date of purchase and where purchased on the spaces provided in the back of this manual.

Disposal of Carton

The packaging is designed to protect the appliance and individual components during moving and is made of recyclable materials:

- Corrugated board/cardboard
- Molded polystyrene (foamed, CFC-free polystyrene)
- Polythene bags and sheets
- Polypropylene straps

WARNING

Keep packaging materials away from children. Polythene sheets and bags can cause suffocation!

Please take the packaging material to your local recycling facility.

Safety Regulations

The appliance is set to operate within specific ambient temperature limits according to its climate rating. These temperature limits should not be exceeded. The correct climate rating for your appliance is indicated on the model plate.

This is explained as follows:

Climate Rating	Set for Ambient Temperatures of
SN	50°F to 90°F (10°C to 32°C)
N	61°F to 90°F (16°C to 32°C)
ST	65°F to 100°F (18°C to 38°C)
T	65°F to 109°F (18°C to 43°C)
SN-ST	50°F to 100°F (10°C to 38°C)
SN-T	50°F to 109°F (10°C to 43°C)

- The refrigerant circuit has been tested for leaks.
- The appliance complies with current safety regulations UL250 and CSA C22.2 #63.

We recommend cleaning the appliance before turning it on for the first time. See **Cleaning**. Turn on the appliance several hours before loading it.

WARNING

Do not allow children to play with the appliance. Children must not climb, sit or stand on the racks or door. Failure to follow these instructions may result in death or serious injury.

INSTALLATION

Dimensions - Figure 1

Figure 1

To level the appliance, adjust the height of the feet with the open-ended wrench supplied.

Installation - Figure 2

The electrical outlet should be easily accessible and not directly behind the appliance.

IMPORTANT

Do not block the ventilation grille (Figure 2).

Figure 2

The appliance is adapted with a door opening limiter. The maximum opening angle is 100°.

Description of Appliance and Equipment - Figure 3

Reversing the Door Hinges - *Figure 4*

Figure 4

OPERATION

Operating and Control Elements - Figure 5

Figure 5

- ① Temperature display
- ② Temperature setting buttons
- ③ Alarm On/Off button
- ④ Fan switch
- ⑤ Childproof lock
- ⑥ On/Off button

Turning the Appliance On and Off - Figure 6

Clean the appliance before turning it on for the first time. See **Cleaning**.

Connect the appliance to the dedicated outlet.

- **To turn the appliance on:** Press the **On/Off** button until the display lights up.
- **To turn the appliance off:** Keep the **On/Off** button pressed for three seconds so that the temperature display goes out.

Figure 6

Setting the Temperature - Figure 7

To reduce the temperature: Press the **Down** button.

To increase the temperature: Press the **Up** button.

- While you are entering the temperature, the set temperature will flash on the display.
- You can change the settings in increments of 1°F (1°C) by briefly pressing the button again. The electronic controls will switch over automatically about five seconds after the last time you pressed the button. The actual temperature will display.

Figure 7

If *F0* or *F1* appears in the display, the appliance has a fault. Contact your nearest customer service representative.

Ventilation button - Figure 8

The ventilation button can be used to increase the relative humidity in the interior.

- **To switch on:** Press the **Ventilation** button. The indicator lamp in the button will light. The fan is permanently in operation = higher humidity.
- **To switch off:** Press the button again so that the fan symbol goes dark. The fan runs in parallel to the compressor = lower humidity.

Note:

- The energy consumption will increase when the fan is switched on.
- To save energy, the fan will switch off automatically when the door is open.

Figure 8

Additional Functions - Figures 9-12

In the setup mode you can set the **childproof lock**, adjust the **brightness of the display** and choose the **unit of temperature** for the display in degrees Fahrenheit or degrees Celsius. The childproof lock is designed to protect the appliance from being switched off accidentally by children.

Activating set-up mode:

- Press the **Ventilation** button for approximately five seconds
 - the **Ventilation** button flashes - the display shows \mathcal{L} for childproof lock.

Note: The value to be altered flashes.

Figure 9

- Select the required function by pressing the **Up / Down** buttons:
 - \mathcal{L} = **childproof lock**, h = **brightness** or \circ = **changing the temperature display**.
- Now select ON or OFF by pressing the **Ventilation** button briefly.
 - For \mathcal{L} = childproof lock, press the **Up / Down** buttons to select:
 - $\mathcal{L} 1$ = childproof lock on or
 - $\mathcal{L} 0$ = childproof lock off and acknowledge with the **Ventilation** button.

When the symbol  is lit, the childproof lock is activated.

Figure 10

For h = brightness, press **Up / Down** buttons to select:

- $h 1$ = minimum to
- $h 5$ = maximum brightness and acknowledge with **Ventilation** button.

Figure 11

For \circ = **unit of temperature**, press **Up / Down** buttons to select $\circ C$ = to display degrees Celsius, $\circ F$ = to display degrees Fahrenheit for temperature display and acknowledge with **Ventilation** button.

Figure 12

Exit the set-up mode:

- Exit the setup mode by pressing the **On/Off** buttons; after two minutes the electronic system switches over automatically. The normal operating mode is activated again.

Audible Warning Signal - Figure 13

The audible warning signal helps you to protect the food in your refrigerator and save energy.

- The audible warning signal sounds when the door is open for longer than about 180 seconds. The audible warning device is turned off by pressing the **Alarm** button.
- The audible warning signal sounds when the interior gets too warm or too cold. The temperature display will also flash. The audible warning device is turned off by pressing the **Alarm** button. The temperature display will continue to flash until the cause of the alarm has been rectified.

Figure 13

REFRIGERATOR COMPARTMENT

Interior Light

The light is located behind the cover in the top of the interior.

The light switches off automatically after the door has been opened for approx. 15 minutes. If it does not switch on when the door is opened briefly, but the temperature setting display is working, the interior light may be defective.

Replacing the Tube - Figure 14

WARNING

To prevent possible injury due to an electrical shock, be sure to disconnect the power cord or turn off the circuit breaker before replacing the interior light tube or cleaning the appliance.

CAUTION

To prevent possible injury due to broken glass, use hand protection when replacing the interior light tube.

- Unscrew the cover panel.
- Turn the tube 90° and pull out downwards.
- Insert a new tube and turn 90°.
- Replace cover panel and screw into place.

Figure 14

Shelf Arrangement - Figure 15

Adjustable Door Rack

Slide the door rack up, pull out toward you and replace in reverse order.

Bottle Holder

You can protect the bottles from falling over when the door is opened and closed. Always hold by the plastic handle.

Figure 15

Air Exchange with Activated Charcoal Filter - Figure 16

Your Liebherr refrigerator is getting its fresh air through an active charcoal filter which is located in the back bottom right-hand corner.

We recommend you replace the filter at least once a year. Filters can be obtained from your Liebherr Dealer or Distributor.

Removing the filter: Hold the filter by the handle. Turn it 90° to the left or right and remove.

Reinstalling the filter: Insert with the handle in a vertical position. Turn it 90° to the left or right until it clicks into place.

Figure 16

DEFROSTING/CLEANING

Defrosting

The refrigerator compartment defrosts automatically. The water that forms on the rear wall drains into a reservoir at the back of the appliance and evaporates automatically through the compressor heat.

Cleaning

WARNING

- To prevent possible injury due to an electrical shock, be sure to disconnect the power cord or turn off the circuit breaker before replacing the interior light tube or cleaning the appliance.
- To avoid injury or damage, do not use steam cleaning equipment to clean the appliance.

Clean the inside and equipment by hand with lukewarm water and a little detergent.

Do not use abrasive or scouring sponges. Do not use concentrated cleaning agents. Never use abrasive or acid cleaners or chemical solvents or steam cleaners.

- Ensure no cleaning water penetrates into the electrical components or ventilation grille.
- Dry all parts well with a cloth.
- Do not damage or remove the model plate on the inside of the appliance. It is very important for servicing your appliance.

Remove any dust from the outside of the ventilation grille (**Figure 17**) with a vacuum cleaner.

Figure 17

Keep your stainless steel looking new by cleaning with a good-quality stainless steel cleaner or polish monthly. High-quality stainless steel cleaners and conditioners are commercially available.

DO NOT CLEAN WITH STEEL WOOL PADS or ABRASIVE PADS. Do not use cleaners that are not for use on stainless steel, such as glass cleaners, tile cleaners or cleaners used to clean counter tops. These types of cleaners can damage the surface permanently.

Stainless steel that is exposed to chlorine gas and moisture may have some discoloration. This discoloration is normal. If your appliance is used in this environment, clean and polish your stainless steel more often.

If the surface discolors or rusting appears, clean it quickly with a nonabrasive cloth and protect it. Always clean and polish in the direction of the grain and finish.

TROUBLESHOOTING

Your appliance is designed and manufactured for a long life and reliable operation.

If a problem occurs during operation, check whether it is due to an operating error. Please note that even during the warranty period, some repair costs may be your responsibility.

You may be able to correct the following faults by checking the possible causes yourself:

Problem	Possible Cause and Remedy
Appliance does not work; display is off	<ul style="list-style-type: none"> - Is the appliance turned on properly? - Is the power cord properly inserted in the outlet? - Is the circuit breaker or fuse in operating condition?
The interior light does not come on	<ul style="list-style-type: none"> - Is the appliance turned on? - Is the interior light turned on? - The bulb is defective. Contact your Liebherr dealer or representative.
Loud running noise	<ul style="list-style-type: none"> - Is the appliance placed firmly on the floor, or does the compressor cause nearby items of furniture or objects to vibrate? If necessary, move the appliance slightly, align by adjusting the adjustable feet, or adjust bottles.
Motor seems to run too long	<ul style="list-style-type: none"> - Is the ambient temperature too hot? See Safety Regulations. - Has the appliance been opened too often or left open too long?
The temperature is not cold enough	<ul style="list-style-type: none"> - Is the temperature setting correct? See Setting the Temperature. - Has an excessive amount of beverages been placed in the appliance? - Does a separately installed thermometer show the correct reading? - Is the ventilation system working properly? - Is the appliance set up too close to a heat source?
<i>F 0</i> or <i>F 1</i> appears in the display	The appliance has a fault. Contact your nearest customer service representative, indicate the type of appliance, index and appliance/serial number.

Customer Service

If none of the above possible causes apply, and you cannot rectify the fault yourself, contact your nearest customer service representative. Indicate the type **(1)** of appliance, service number **(2)** and the appliance/serial number **(3)** as indicated on the model plate. The model plate is located on the left-hand inside wall.

LIEBHERR WARRANTY PLAN

FULL TWO YEAR WARRANTY - For two years from the date of original purchase, your Liebherr warranty covers all parts and labor to repair or replace any part of the product which proves to be defective in materials or workmanship.

FULL FIVE YEAR WARRANTY - For five years from the date of original purchase, your Liebherr warranty covers all parts and labor to repair or replace any components that prove to be defective in materials or workmanship in the sealed system. The "Sealed System" means only the compressor, condenser, evaporator, dryer and all connecting tubing.

LIMITED 6TH THROUGH 12TH YEAR WARRANTY - From the 6th through 12th year from the date of original purchase, your Liebherr warranty covers all parts that prove to be defective in materials or workmanship in the Sealed System (parts only).

TERMS APPLICABLE TO EACH WARRANTY

All service provided by Liebherr under the warranty must be performed by authorized Liebherr service representatives, unless otherwise specified by Liebherr. Service will be provided in the home during normal business hours. This warranty applies only to products installed for normal residential use. Details regarding a non-residential warranty are available on request.

The warranty applies only to products installed in Canada and any one of the fifty states of the United States or the District of Columbia. This warranty does not cover any parts or labor to correct any defect caused by negligence, accident or improper use, maintenance, installation, service or repair, including but not limited to improper removal and reinstallation of the condensing unit.

The remedies described above for each warranty are the only ones which Liebherr will provide, either under these warranties or under any warranty arising by operation of law. Liebherr will not be responsible for any consequential or incidental damages arising from the breach of these warranties or any other warranties, whether express, implied or statutory.

Some states do not allow the exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

To receive parts and/or service and the name of the Liebherr authorized service representative nearest you, contact your Liebherr dealer or distributor or contact the Liebherr designated national service provider:

in the US: Liebherr@adcoservice.com, or call 1-866-LIEBHERR or 1-866-543-2437

in Canada: www.euro-parts.ca, or call 1-888-LIEBHERR, 1-888-543-2437.
