GAS RANGE

5.0 cu.ft. Capacity

Cook your whole meal at once with LG's spacious 5.0 cu.ft. gas range. This model has adequate room for several large items and complements its large capacity with optimal cooking performance.

Super Boil™

The LG Gas Range comes equipped with a 16.5K BTU high output burner with Super Boil™ setting. This feature is designed to quickly bring larger amounts of liquid to a boil. It should be used with cookware that is 10 inches or larger in diameter.

5 Burner System

The five sealed cooktop burners offer flexibility in your cooking options while being easy to use and clean. The smallest burners, including the center unit (which can maintain a low 700 BTU setting), can be used for simmering. The all-purpose burners are found at the left-front and left-rear positions, while the right-front is the largest burner with the highest output for faster boiling and use with larger cookware.

SmoothTouch Controls

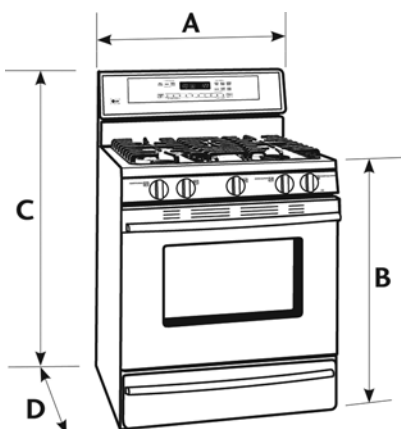

The easy-to-use control system is smooth to the touch and easy to clean.

Warming Drawer

The warming drawer can be used to keep hot food at serving temperature. With 3 heat settings, you can warm your main course or dessert until you're ready for them.
