## IMPORTANT-Please Read and Follow!

- Make sure that incoming voltage is the same as unit rating. An electric rating plate specifying voltage, frequency, wattage, amperage, and phase is attached to the product.
-To reduce the risk of fire, electric shock, or injury to persons, installation work and electrical wiring must be done by qualified people in accordance with all applicable codes and standards, including fire-rated construction
- The installer should leave these instructions with the consumer who should retain them for local inspector's use and for future reference.

It is your responsibility to

- Comply with installation specifications and dimensions
- Properly install unit
- Remove any moldings or decorative panels that prevent the unit from being serviced
- Make sure that you have these materials (not provided with your unit), which are necessary for proper installation
$-1 / 4^{\prime \prime}(6 \mathrm{~mm})$ copper tubing with shutoff
valve
-6- \#8 x $3^{\prime \prime}(7.6 \mathrm{~cm}$ ) wood screws (longer screws may be required) feature of the valve)
- Assure that floor will support unit, door panels and contents (approximately 1200
pounds ( 540 kg )
- Assure that location will doors to open $90^{\circ}$ minimum

## A WARNING

Your safety and the safety of others is very important.
We have provided many important safety messages in this manual and on you appliance. Always
safety messages.
! This is the safety alert symbol. This symbol alerts you to hazards that can kill or hurt you and others.
All safety messages will be preceded by the safety alert symbol and the word"DANGER" or "WARNING." These words mean:

## A DANGER

## You will be killed or seriously injured if

 you don't follow instructions.
## A WARNING

You can be killed or seriously injured if you don't follow instructions.
All safety messages will identify the hazard, tell you how to reduce the chance
injury, and tell you what can happen in
the instructions are not followed.

## ! WARNING tIP OVER HAZARD <br> Appliance is top heavy and tips easily hen not completely closed until appliance is completely installed and secured per installation instructions. Use two or more people to move and install appliance Failure to do so can result in death or serious injury

[^0] operating position to protect floor surface.

## Cabinet Information Designeer

Cabinet Information (Designen)

Designer models fit flush in standard $24^{\prime \prime}(61.0 \mathrm{~cm})$ deep cabinet openings with no protrusion into the room except $2^{\prime \prime}(5.1 \mathrm{~cm})$ curved handle depth.

## Custom Side Panel Dimensions

* Depending on how high leveling feet are raised, and cabinet enclosure height.

## Custom Side Panel Dimensions

 (Designer \& Professional Integrated)

* Depending on how high leveling feet are raised, and cabinet enclosure height.

## General Information

## Area Requirements

Verify the following:

- Unit can fit into residence and can be moved around corners and through doorways.
- Floors can support unit's weight plus food weight (approximately 1200 pounds [ 540 kg ]. total).
- Rear wall is solid and is able to support two horizontally mounted 2X4s (included) bolted to two wall studs. The 2X4 board bolt heads must be flush with $2 \times 4$ to prevent obstruction.
- Remove anything attached to rear or side walls that can obstruct unit installation.
- Cutout dimensions are accurate
- Electrical outlet is in correct location.
- Water line is in correct location.
- Do not install a refrigeration unit near a heat source, nor in a location where the surrounding temperature will fall below $60^{\circ} \mathrm{F}\left(16^{\circ} \mathrm{C}\right)$.

## Electrical Requirements

It is the customer's responsibility to:

- Contact a qualified electrical installer.
- Assure that the electrical installation is adequate and in conformance with the National Electrical Code, ANSI/NFPA 70 latest edition or Canadian Electrical Code C22.1-1998 and C22.2 No. 0-M91 (or latest edition), and all local codes and ordinances. A 115 volt, $60-\mathrm{Hz}, 15 \mathrm{amp}$ fused, electrical supply is required. It is required that a separate circuit serving only
this appliance be provided. This appliance is equipped with a power supply cord having a 3 -prong grounding plug. To minimize possible shock hazard, the cord must be plugged into a mating 3 -prong, grounding-type wall receptacle
Do not use an extension cord
If codes permit a separate grounding wire to be used, it is recommended that a qualified electrician determine that the grounding path is adequate
DO NOT ground to a gas pipe. Check with a qualified electrician if you are not sure the appliance is properly grounded. DO NOT have a fuse in the neutral or grounding circuit.

Anti-Tip Requirements
The anti-tip boards should be fastened into position prior to moving the unit into the opening.

NOTE: Additional mounting boards may be required if the unit does not touch the back wall of the enclosure. To prevent unit from tipping forward, it must be secured in place with a solid offit or wood block.

## AWARNING

To avoid serious illness or death, do not use unit where water is microbiologically unsate or of unknown quality without adequate disinfection
before or after the system. Systems certified for cyst before or after the system. Systems certified for cyst may contain filterable cysts. The contaminants or may contain fiterable cysts. ore contaminatss or
other substances removed or reduced by this water treatment system are not necessarily in you water.

## General Information

Water Supply Requirements

## ACAUTION

when filter change is required<br>-If water filtration system has been allowed to freeze, replace filter cartridge.<br>-If system has not been used in several months, and water has an unpleasant taste or odor, flush system by dispensing 2-3 glasses of water. If unpleasant taste or odor persists, change filter cartridge.

Use only $1 / 4^{\prime \prime}(6 \mathrm{~mm})$ copper tubing for water line. Do Not install copper tubing in area where temperatures drop below $35^{\circ} \mathrm{F}\left(1.7^{\circ} \mathrm{C}\right)$. Before attaching copper tubing to the unit, flush at least 2 quarts ( 1.9 L ) of water through the copper tubing and into a bucket to remove any particles in the water line.

- Viking Range Corporation is not responsible for property damage due to improper installation or water connection.
- Connect $1 / 4^{\prime \prime}(6 \mathrm{~mm})$ flexible copper tubing to household plumbing in compliance with local codes and ordinances.
- Length of copper tubing must reach from water supply connection to the unit connection with an additional length to facilitate moving the unit out of enclosure for cleaning or service. Tubing should be soft instead of rigid and ends should be free of burrs.
- Copper tubing route must be above $35^{\circ} \mathrm{F}$ $\left(1.7^{\circ} \mathrm{C}\right)$ to prevent water line from freezing.
- Do not use plastic water lines from the household plumbing to the water inlet valve connection on the refrigeration unit.
- Do not use the self-piercing feature of a saddle valve. The hole made by the piercing lance is too small for the water flow rate required by the ice maker.
- If saddle valve is not used, place a separate shut-off valve in an easily accessible location between water supply and the unit. Do not locate shut-off valve behind the unit.
- The installation of Viking units with a reverse osmosis system is acceptable as long as the water pressure remains within the allowable PSI as stated below It is important to note that with many reverse osmosis systems, the pressure starts off high, but then it decreases as the water level of the reverse osmosis storage area drops. This must be considered when checking the water pressure coming into the unit.
- Connect a vertical or horizontal $1 / 2^{\prime \prime}(1.2 \mathrm{~cm})$ to 1-1/4" ( 3.2 cm ) COLD water line near water area.
- Run water line through the floor, back, or side wall. Tubing should lay flat on floor underneath the unit. Clamp tubing to wall or floor.
- Water pressure must be greater than 20 psi and less than 120 psi on non-dispensers and greater than 35 psi and less than 120 psi on dispensers.

## General Information

- Most of the unit's weight is at the top. Extra care is needed when moving the unit to prevent tipping
- Do not remove protective film until unit is in operating position
- All four leveling legs must contact the floor to support and stabilize the full weight.
- Do not drop unit.
- Remove exterior shipping materials prior to moving unit into home, except door latching device.
- Use two or more people to move and install unit. Failure to follow this instruction can result in back or other injury
- To avoid personal injury, wear gloves when performing any installation procedure and wear eye protection when cutting metal straps.

Moving Unit

Remove shipping brackets from skid by removing four
bolts (two on each side) with a $1 / 2^{\prime \prime}$ deep-well socket bolts (two on each side) with a $1 / 2^{\prime \prime}$ deep
wench and a pair of pliers.
NOTE: Tilting unit is not required to remove

## TIP OVER HAZARD

Appliance is top heavy and tips easily when not completely installed. Keep doors closed until appliance is completely installed and secured per installation instructions. Use two or more people to move and install appliance. Failure to do so can result in death or serious injury

Unpacking Unit

1. Remove top and bottom strap.
2. Remove top cap.
3. Cut carton rear approximately $1 / 4^{\prime \prime}$ $(0.6 \mathrm{~cm})$ to $1^{\prime \prime}(2.5 \mathrm{~cm})$ from right corner with a utility knife extended $1 / 4^{\prime \prime}(0.6 \mathrm{~cm})$.
4. Remove carton and exterior packaging Save cardboard shipping material to protect floor surface when installing unit. Remove anti-tip board, kickplate and door trim pieces (DF models) from rear of unit.

Slip appliance dolly between unit and skid. Remove unit from skid.
NOTE: Use excess packaging to protect decorative trim; also, verify that leveling legs are up ( $0^{\prime \prime}$

## Installation

Place unit in front of cutout.

Designer) Pull the center grille louver up at an angle and pull out

Remove grille assembly.

(Professional) Lift center grille louver up
and pull out.

Using an 8" magnetic nut driver

$$

Water Filter Installation (side-by-Side with Dispenser)

Locate water filter door. The door is located und
the Meat SavorTM/Produce drawer handle.

Insert filter cartridge into circular opening in filter housing. Rotate clockwise gently until filter stops.

Push upper left corner of door to relea
and pull door downward.

NOTE: Allow 1-2 minute delay in water dispersal to allow internal water tank to fil dispenser continuously for 3 minutes.

Water Filter System Specification and Performance Data Sheet
This system has been tested according to NSF/ANSI $42 / 53$ for reduction of the substances listed below. Th
concentration of the indicated substances in water entering the system was reduced to a concentration of less than or equal to the permissible limit for water leaving the system, as specified in NSF/ANSI 42/53.* ( $100 \%$ safety factors builtin for unmetered usage for health claims only.)

## Capacity: <br> Pressure Requirement: $\quad 20-120$ psi ( $2.8-8.2 \mathrm{bar}$ ) <br> Temperature: $33-100^{\circ} \mathrm{F}\left(0.6-38^{\circ} \mathrm{C}\right)$ $0.78 \mathrm{gpm}(2.9 \mathrm{l} / \mathrm{min}$.

Certified for up to 750 gallons ( $2,838 \mathrm{~L}$ ); up to nine month

Flow rate:
Check for compliance with the state and local laws and regulations.
Note: While the testing was performed under standard laboratory conditions, actual performance may vary. Installation instructions, parts and service availability, and standard warranty are included with the product when shipped. This drinking water system must be maintained according to manufacturer's instruction, including replacement of filter cartridges.

Manufactured by: Cuno, a 3M company 1000 Apollo Road Eagan, MN 55121

System tested and certified by NSF International
against Standard 42 for the reduction of chlorine taste
and odor, particulate Class I and Standard 53 for the and odor, particulate Class I and Standard 53 for
reduction of Lead, Lindane, Atrazine, Mercury,
Toxaphene, Cyst, Turbidity, and Abestos.

Final Installation

Replace top air grille.

(Professional) Replace the center grille louver.
(Designer) Replace the center grille louver

## Performance Checklist

$\square$ Verify cabinet size.
$\square$ Verify electrical supply and water supply (if applicable).
$\square$ Install anti-tip device(s) and verify unit is secure.
$\square$ Position unit in cutout, level at desired height and secure unit.
$\square$ Plug-in unit and verify operation
$\square$ Connect water supply (if applicable),

- Verify icemaker fill tube is properly inserted
-Verify icemaker bail arm is down
- Verify dispenser operation
(if applicable).
$\square$ Align/square door(s).
$\square$ Verify drain pan is properly installed and no leaks on water connection.
$\square$ Install kickplate.
$\square$ Remove internal packaging and labels and wipe unit down.

## Verify Operations

Control Panels

## Bottom Mount

## Hity Side by Side <br> 

1. Press "Display On" or "Activate Controls" pad
2. Verify unit is not in Sabbath Mode

If in Sabbath Mode:
A. The Sabbath Mode will disable the interior lights, display (except three blue squares) and alarm. (See picture below for visual indication of Sabbath Mode)

To exit the Sabbath Mode:
Press \& Hold "Display On" or "Activate Controls" and then "Display Off" for 3 seconds. (The control will beep three times to alert the user the Sabbath Mode has been exited)
3. Verify unit is not in Showroom Mode

If in Showroom Mode:
A. The Showroom Mode will disable the refrigerator system but all other functions are normal. These include lights and control. (See picture below for visual indication of Showroom Mode)

To exit Showroom Mode
B. Press \& Hold "Display On" or "Activate Controls"; while holding, press and hold "Higher Temp" and "Alarm Off" togethe
4. Press "Max Frz" \& "Display Off" at the same time and hold until beeps (force start compressor). 5. All models need to be set at the 5th bar for Refrigerator \& Freezer - factory setting

## Service \& Registration

#### Abstract

Only authorized replacement parts may be used in performing service on the appliance Do not repair or replace any part of the appliance unless specifically recommended in the manual. All other servicing should be referred to a qualified technician.

Record the following information indicated below. You will need it if service is ever required The serial number and model number for you appliance are located on the identification plate mounted behind the top light.

## Model number
