THRU-THE-WALL AIR CONDITIONERS

www.friedrich.com

QUALITY

**COOLING ONLY
HEAT PUMP
ELECTRIC HEAT**

THRU-THE-WALL air conditioners mount flush with exterior walls for a sleek appearance, as well as unobstructed window views. Thru-the-wall units may be installed higher or lower on a wall for optimal placement, and can handle thick wall installations where side fins must be avoided.

WallMaster®

The Most Energy Efficient Solid-side Air Conditioner *perfect for new construction, retrofits and residential remodeling*

COOLING ONLY, HEAT PUMP & ELECTRIC HEAT

- High efficiency operation saves on energy costs
- Residential/ commercial application
- Mounts flush with the exterior wall for a neat appearance
- Exact fit for Fedders A and B* sleeves. Sleeve measures 27" W x 16 3/4" H
- Ideal for thicker wall installations, where side fins don't fit
- Easy-to-reach, top mount controls
- Three-speed fan
- Magna 1 copper coils
- Efficient rotary compressor
- Easy-to-clean filter

REMOTE CONTROL FEATURES (cool only models)

- 24 hour programmable timer
- Money Saver® setting saves energy by cycling the fan with the compressor
- Smart Fan auto-adjusts fan speed to maintain desired temperature
- Auto-memory backup

ELECTRONIC FEATURES (cool only models)

REMOTE CONTROL	24-HOUR TIMER	MONEY SAVER FEATURE	SMART FAN

*B sleeve requires a baffle kit. See BAK accessory on back page.

Units are shown installed in WSC sleeve (sold and shipped separately)

Sleeve Dimensions Friedrich/Fedders	Friedrich WSC Sleeve	Fedders A Sleeve	Fedders B Sleeve*
Height (inches)	16 3/4	16 3/4	16 3/4
Width (inches)	27	27	27
Depth (inches)	16 3/4	16 3/4	19 3/4

Uni-fit®

Universal Fit for Easy Replacement *chassis installs into existing 26" sleeves*

COOLING ONLY & ELECTRIC HEAT

- Rotary compressors provide quiet, dependable performance
- Six-way air flow control
- Stale air exhaust
- Auto re-start
- Permanent filter
- Seacoast protection

HEAT/COOL MODELS feature mechanical controls, two cooling speeds, two heating speeds, plus one fan-only setting.

COOLING MODELS feature electronic controls with remote control, Money Saver® setting that saves energy by cycling the fan with the compressor and three cooling/ three fan-only speeds.

ELECTRONIC FEATURES (cool only models)

REMOTE CONTROL	12-HOUR TIMER	MONEY SAVER FEATURE

WALLMASTER HEAT PUMPS

Calculate the heat loss of the space to be heated. As long as the heat loss does not exceed the resistance heating capacity rating of the unit, the heating performance will be satisfactory.

Change-over from heat pump operation to resistance operation on models indicated is automatic at a preset outside ambient temperature of approximately 35°F.

If condensate disposal is desired, an optional drain kit is available.

DEFROST CONTROL: Initiated at 20°F (outdoor coil temperature) and terminated at 43°F (outdoor coil temperature). During defrost, the compressor stops and the electric heat starts, then operates with the fan to maintain indoor comfort. Below 43°F, the unit remains in electric heat mode. During electric heat mode, the unit will achieve the following ratings: 11000/9100 BTU/h, 16.0/14.7 amps, and 3550/2950 watts.

DEFROST DRAIN: Drain automatically opens at approximately 50°F in outdoor base pan for defrost condensate disposal.

IMPORTANT:

- Sleeves are sold and shipped separately to accommodate new construction and replacement requirements
- UE models **do not** fit Westinghouse/Frigidaire sleeves.
- US models **do** fit Westinghouse/Frigidaire sleeves.

WallMaster® Exterior Grilles

WSC Sleeve /Standard Grille

WSC Sleeve/ optional Architectural Grille

IMPORTANT:

Operating the air conditioner with incorrect rear grille or without Baffle Adapter Kit (on 19 3/4" deep sleeve) will recirculate discharge air and cause compressor overload to trip.

CORRECT Vertical Louvers

INCORRECT Horizontal Louvers

Installation Accessories (WallMaster only)

DK / Drain Kit

Installed at the back of the unit and allows for attachment to permanent condensate disposal system, if disposal is necessary or desired.

SB / Sub Base

Used as a base for the unit when it is desired to place the cord and receptacle within the installation, or simply as a base for the unit when mounted low in the wall.

IDK / Internal Drain Kit

New construction applications with reverse cycle units where a condensate drain system has been built into the wall interior.

BAK / Baffle Adapter Kit

Necessary when installing in a sleeve deeper than 16 3/4" deep, such as Fedders B sleeve (19 3/4" deep).

Uni-fit® Exterior Grilles

USC Sleeve /Standard Grille

USC Sleeve/Replacement Grille*

*REPLACEMENT GRILLE – high-tech plastic

For use on existing sleeves without any grille.

IMPORTANT NOTE:

When installing into an existing sleeve, consult Installation Section of your Installation/Operation Manual to determine whether or not the grille needs to be replaced and/or a baffle adapter should be used.
