30" Induction Cooktop

Cooking Performance

- 4 Cooking Elements with Bridge
- 100% Induction Bridge Element

Style and Design

- Premium Stainless Steel Trim

Convenience Features

- SmoothTouch™ Controls
- Premium Grade Griddle Included

INDUCTION COOKTOP

How Does Induction Work?

The electromagnetic energy generated by an induction coil reacts only with iron-like metals, not with ceramic surfaces. The pot absorbs the electromagnetic energy, and converts it into heat. Only the bottom of the pot is heated, which guarantees even heating, safety and energy savings.

Bridge Element with 100% Induction Cooking

In addition to being used separately, the left front and left rear elements can be joined by the bridge element to evenly heat longer pans and griddles; perfect for your pancakes and French toast. Unlike most manufacturers, LG's induction cooktop features a bridge element that uses 100% induction, with no need for a traditional heating element.

SmoothTouch™ Controls

Activate and control the temperature setting with the touch of a finger.

Cooking Zone Layout

Accommodates all kinds of cooking needs from large pan to the supplied griddle.

Streamlined Design

Elegant ceramic glass with a premium stainless steel trim will complement any kitchen décor.

LCE30845

Type	Electric Induction
Size	30"

CONFIGURATION

No. of Cooking Zones	4 (Plus Bridge)
Cooking Zone Configuration (Normal/Boost)	
Large: Right Rear	1 – 10" Induction (2400W/3300W)
Small: Right Front	1 – 6" Induction (1400W/1800W)
Standard: Left Side	2 – 7" Induction (1800W/2400W)
Bridge: Left Side	1 – 7" x 16 5/8" Induction
Power Boost*	All Cooking Zones (Minus Bridge)
Warming Function	All Cooking Zones

CONTROLS

Type	Electronic Glass Touch
Location	Front
