

Temperature Logger DL1KIT

0.75" x 5.38" x 5.0" (H x W x D)

USB data logger for temperature recordings on any SUMMIT refrigerator or freezer

Highlights:

- Includes 64 MB flash drive for over 80 years storage.
- Glycol bottle to simulate vaccine temperature for high accuracy
- Outputs for fast viewing in Microsoft Excel or any .CSV compatible program
- Automatically records interior temperature in 15 minute intervals

NIST traceable probe	Accurate within 1° C (1.5° C when installed on low temperature freezers operating between -30 and -25° C)
Stores data to USB flash drive	64 MB flash drive included for easy plug-in and output on any computer
Long term data storage	USB can hold over 2.5 million temperature readings for over 80 years of data storage
Easy analysis	Simply plug the flash drive into a PC or Mac and graph or chart in Microsoft Excel or .CSV compatible program
Compact size	Sized to fit on undercounter models with no depth protrusion
Power loss event logging	Records event of power loss, allowing you to determine amount of time power was out
Programmable time and date	Easy to set before using the device
Automatic temperature recording	Records interior temperature every 15 minutes
Compatible on any Summit model	Can be installed on refrigerators and freezers, including chest, front-opening, drawer, compact, reach-in, and built-in undercounter units
Indicator light	LED blinks when in operation and goes into steady mode to alert that the USB drive is full

Specifications:

Height	0.75"
Width	5.38"
Depth	5.0"
Other Energy Info	6V Power Supply
Amps	0.5
US Electrical Safety	UL
