6GARM

Glass Door Refrigerator/Beverage Center Luxury Series

Features at a Glance

HALF-WIDTH SHELF

Our half-width shelf allows vertical storage of tall items and it can be positioned on the left or right side. When positioned, the half-width shelf opens space on the opposite side for tall and/or open bottle storage.

GLASS SHELF

Two full-width tempered glass shelves offer large capacity of storage. In need of additional wine storage, remove the glass from the shelf and store up to 6 additional bottles per shelf.

MICROSENTRY™

An exclusive refrigeration monitor offered by Marvel, which controls the refrigeration system's performance to maintain a constant precise temperature. Visual and audible alarms indicate temperature excursion that may affect the quality of the stored contents and indicate if the door has been left open.

FOOD & DRINK

The 6GARM features a temperature range of 35 °F to 43°F. This is perfectly suitable for beverage and perishable fresh food storage.

CLOSE DOOR ASSIST

Marvel's 'Close Door Assist' is designed into the hinge system to draw the door closed when it is accidentally left ajar.

FORCED AIR COOLING

Marvel's forced air cooling system evenly distributes air for consistent temperature throughout the refrigerator. This minimizes temperature gradients and reduces "pull-down" and "recovery" times.
