Premium Free Standing Electric Double Oven

LG Life's Good

InfraGrill™ System

LG's first infrared heating element gets your oven to broil temperature more quickly and cuts 24% off your cooking time on common items like hamburgers and chicken breasts. Infrared cooking – which uses the same technology as premium outdoor grills – also allows your food to be juicier than traditional thermal cooking.

Tallest Upper Oven

LG provides you with the tallest upper oven in the industry, allowing you to bake and broil tall items in the smaller oven without having to preheat a big oven. The 6" height allows for easier access to insert or remove items from the oven.

Large Capacity

Cook two meals at once – Allows you to cook different dishes at different temperatures all at the same time. Gives you room for everything you'd need for a holiday dinner.

SmoothTouch™ Controls

Using your oven has never been easier. Intuitive, digital controls allow heat and function adjustments to be made with the touch of a finger.
