SPORTS, FAST-ACTION & ENTERTAINMENT

LG's PN4500 lets you enjoy fast action entertainment to its fullest with 600Hz Max Sub-Field Driving. And, this Energy Star certified plasma uses about 30% less energy than standard TVs so you can save money and energy.

HD 720P RESOLUTION

You aren't really watching TV if it's not an HDTV. Pictures are sharper. Colors are more vibrant. Entertainment is more real. Everything looks better on an HDTV.

600HZ MAX SUB-FIELD DRIVING

Capture every moment. Tired of streaky action or unclear plays during the game? See sports, fast action and video games in Full HD like never before. The 600Hz technology virtually eliminates motion blur.

ENERGY STAR® QUALIFIED

Earning the ENERGY STAR means a product meets strict energy efficiency guidelines set by the US Environmental Protection Agency and the Department of Energy. For TVs, it means they save energy both in standby and active (when they're on) modes. ENERGY STAR qualified TVs use about 30% less energy than standard units.
