## about Blomberg

With 125 years of production and expertise in the appliance and metal industries, Blomberg is a quality name in the European household appliance market. Now owned by Arcelik, the 3<sup>rd</sup> largest appliance manufacturer in Europe, Blomberg has gained a sizeable presence in the European home. For years Blomberg has been setting trends in both technology and style, and continues to employ technologically advanced appliances, while still keeping the everyday family life in mind.

Blomberg has introduced an outstanding collection of laundry products with advanced German engineering and state-of-the-art designs. The products are Energy Star or Energuide certified to conserve energy and save you money. They are designed to provide the perfect wash results with the utmost care of your laundry.

## perfect partners

Since a wash is not complete until clothes are thoroughly dried, Blomberg offers washer and dryer models that are the perfect partners both aesthetically and ergonomically. The washer and dryer can be stacked on top of each other or installed side-by-side. The dryer door is reversible for easy transfer of laundry when the machines are placed next to each other.

## electronic control

Because you value your clothes, from delicate fabrics to tough denims, Blomberg has developed technologies and programs that understand your desire to keep them looking and feeling new. Therefore, all Blomberg laundry products have ergonomically positioned control panels, and fully electronic controls and intelligent programs operated via a single dial, for simple program selection.

## energy star

Blomberg laundry products incorporate the latest technology with state-of-the-art design, so they not only look good, but also give an outstanding performance. Our washers are Energy Star, and our dryer is Energuide qualified, protecting the environment while saving you money, energy, water and use less soap powder to clean your garments.

## environment friendly

Blomberg laundry products are not only energy efficient, but also RoHS compliant. The products are built of 99,9% lead-free materials, and 95% of our components are recyclable.

## security

For your peace of mind, Blomberg laundry products feature a child lock option. Once it is activated, any alteration to the selected settings is ignored, so little fingers cannot upset your laundry.

## the washers

For the perfect care of your clothes, Blomberg laundry products include smart, high performing and easy-to-use washers with **2.1** and **2.35 cubic feet (IEC)** capacity options.

### electronic control

Blomberg washers feature a **numerical display** or a series of **LED indicators**. The numerical display offers a delayed start option for up to 24 hours. The remaining time option keeps you informed about the duration of your wash cycle and helps you to plan your time more efficiently.

LED indicators tell you exactly which stage your washing cycle has reached. Additionally, the 3 / 6 / 9 hour delay start option allows you to set the machine to run when it suits you.

### expert features

Depending on the model, Blomberg washers offer a variety of spin speeds up to **1200 rpm**. To prevent fabrics from being damaged, maximum spin speeds are limited in specific cycles.

Blomberg washers feature an **automatic detergent dispensing** system, which facilitates dispensing of detergent, bleach and fabric softener at the right stage of the wash cycle.

Blomberg washers are equipped with **internal water heaters**, which enable higher water temperatures for better wash performance and the total hygiene of cottons and baby clothing.

**Sensorinse suds detection system** measures the excessive foam in the laundry and automatically adjusts the rinse cycle for a perfect result. Sensorinse ensures efficient rinsing and prevents risks of irritation to sensitive skins and white traces on dark colored textiles.

Blomberg washers are equipped with the **automatic water adjustment system**, for conservation of water resources. By means of this system, your machine adjusts its water intake based on the amount of the laundry consuming less water for less clothes.

## special functions

### quick wash

To save time and energy, Blomberg washers feature the quick wash function, which reduces the wash period for lightly soiled cottons and permanent press.

quick wash

### super wash

The super wash function helps you to obtain the best washing result for heavily soiled items, and rid clothes of even the toughest stains by increasing the wash duration.

super wash

### extra rinse

The extra rinse function allows you to increase the current number of rinse cycles. This option ensures efficient rinsing and prevents risks of irritation to sensitive skins and white traces on dark colored textiles.

extra rinse

## the electric dryer

For a complete laundry care, Blomberg features an **air-vented dryer** with a capacity of 3.67 cubic feet.

### electronic control

The Blomberg dryer is equipped with a series of **LED indicators**, which tell you exactly which stage your drying cycle has reached.

### expert features

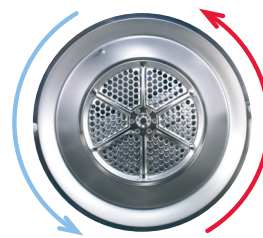

The Blomberg tumble dryer features a combination of **moisture and temperature sensors**, which automatically determine when the clothes are dry, preventing damage from over-drying. The moisture sensor ensures that the fabrics are evenly dried and indicates the humidity level, allowing you to reach the right dryness level for different types of fabric, from extra- to damp-dry.

After the drying cycle the **anti-creasing cycle** is automatically activated. The gentle drum action separates and smoothes your laundry, so it's wrinkle-free and ready to wear.

The **special drum paddles** with their unique form ensure a more homogenous drying as well as less creasing. Moreover, you will not be facing any tangling problems especially for bulky items, such as bed sheets.

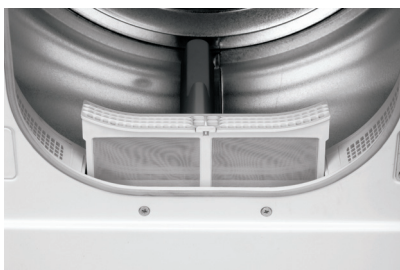

The **bi-directional drum action** ensures that your laundry dries evenly.

### ease of use

The **15 inch wide door opening** of your Blomberg dryer facilitates the loading of even the bulkiest items. In addition, the door is reversible to provide extra versatility and ease of use.

At the end of the drying cycle a **buzzer** warns you that the program has ended, and your clothes are ready to be removed. You have the option of stopping the buzzer by pressing the buzzer button.

The **easy-reach lint filter** collects all the lint that is usually produced when clothes are dried. The filter is easily removed and cleaned, so your tumble dryer's efficiency is always at its best.

# expert programs

## washer

In addition to soak, spin and drain options, Blomberg washers feature special programs engineered for different fabrics.

### cottons / regular

For the care of your cotton garments, Blomberg washers feature a choice of programs with wash temperatures ranging from 60°F to 165°F. The cold cycle is for lightly soiled cottons while the sanitary cycle provides maximum hygiene for highly soiled clothes.

cottons / regular

### permanent press

To ensure safe cleaning of synthetic fibers, Blomberg washers offer three different alternatives from cold to hot according to the dirt level of your laundry. Furthermore, your machine limits the spin speed to 800 rpm for a longer fabric life.

permanent press

### delicates

For your extra delicate laundry, Blomberg washers offer the delicates cycle where the temperature is limited to 95°F and the spin speed does not exceed 600 rpm.

delicates

### handwash

Handwash cycles allow the safe wash of fabrics such as silks and cashmere. These programs wash gently with a slow and even drum movement that delivers highly efficient cleaning while caring for and extending the life of clothes. With the intelligent control system, your washer automatically limits the spin speed to 600 rpm, and for complete handwash protection the cycle will not allow you to select any function, which may damage your clothes.

handwash

### wool

To extend the life of woolens, Blomberg washers feature special wool wash cycles, which gently rock your clothes to and fro and limit the spin speed to 600 rpm.

wool

## dryer

For different laundry needs, the Blomberg dryer offers flexible program options.

### cottons / regular

This program is ideal for durable cottons such as sheets. You have the option of choosing the drying level between damp, regular and extra dry alternatives.

cottons / regular

### permanent press

For less durable fabrics, Blomberg features the permanent press cycle, which dries the laundry at a lower temperature. This program is ideal for synthetic clothes.

permanent press

### delicates

Delicate drying is a special cycle for your delicate laundry items where the drying time is limited to 30 minutes.

delicates

### refresh

The refresh cycle is a freshen-up program that partly eliminates odors in clothes, without having to wash them.

refresh cycle

### timed programs

To achieve the desired final drying level, the Blomberg dryer features 15, 30 and 75-minute timed program options. Regardless of the dryness level of the laundry, the cycle continues to dry at a low temperature for the duration chosen.

timed programs

### mixed fabrics

This program is specially designed for clothes made of different types of fabric. It provides low-temperature, gentle drying for longer garment life.

mixed fabrics

# Environment friendly

All Blomberg laundry products are RoHS compliant (lead-free), and Energy Star or Energuide qualified.

## laundry models

**WM 67120 NBL00**  
white-silver

- 2.35 cu.ft (IEC) (7 kg) load capacity
- Euro wash system with internal heater
- Numerical display
- Variable spin speed from 600 to 1200 rpm
- Spin selection option
- 16 programs
- Functions: quick wash, extra rinse, super wash
- 24 h time delay
- Remaining time
- Automatic water adjustment system
- Automatic detergent dispensing system
- Automatic temperature control
- Sensorinse suds detection system
- Unbalance detection system
- Stainless steel drum
- Child lock
- Energy Star qualified

**WM 26110 NBL00**  
white-white

- 2.1 cu.ft (IEC) (6 kg) load capacity
- Euro wash system with internal heater
- Variable spin speed from 600 to 1100 rpm
- Spin selection option
- 12 programs
- Functions: quick wash, extra rinse, super wash
- 3 / 6 / 9 h time delay
- Automatic water adjustment system
- Automatic detergent dispensing system
- Automatic temperature control
- Sensorinse suds detection system
- Unbalance detection system
- Stainless steel drum
