

Full Size Built-In Refrigeration

Designed Exclusively for You

Side-by-Side Refrigerator/Freezers

PICTURED: MODEL M60CSS-WS

Your custom refrigeration specialists for over 80 years

Our heritage began with Ranney ice box production in the 1890's, making us the oldest refrigeration company in North America. The MARVEL name was established in 1932, when the company began creating undercounter ice boxes, and our leadership has continued through the years with innovations like:

The first premium undercounter wine storage and beverage center

The first stainless steel interior and glass door built-in refrigerator for residential use

The 72-inch wide built-in refrigerator/freezer combination, the world's largest capacity home use system

Today, MARVEL brings you the widest selection of built-in refrigeration sizes and configurations, including all-refrigerators, all-freezers, refrigerator/freezers (both side-by-side and top mount models), wine cellars and beverage centers. Models are available in 6 inch increments from 18 to 72 inches.

Our full-size integrated solutions are never mass produced, made just for you with years of experience, craftsmanship, and the highest quality components. Let MARVEL give your kitchen the individual touch only a custom-designed refrigerator can bring.

SIDE-BY-SIDE MODELS

Each of MARVEL's side-by-side refrigerator/freezers displays our commitment to superior construction, choice and capacity. Interiors are solidly built in your choice of arctic white or gleaming stainless steel. All products are frost-free and have the exclusive MARVEL cooling system for optimum performance.

Door options include stainless steel and panel/overlay. The refrigerator door is also available in a glass door with stainless steel wrap or panel/overlay.

Only MARVEL offers you an extensive choice of widths. Available in 36", 42", 48" and our exclusive large capacity 60" and 72" models, these refrigerators are exceptional when it comes to food preservation and are unequalled in terms of capacity.

All models have an automatic ice maker, LED interior lighting, clear crispers, easily adjustable interior shelves and formed metal door bins. With all this superior construction, choice and capacity, our side-by-side may well be the last refrigerator you ever buy.

Side-By-Side Refrigerator/Freezer with Panel Overlay Doors

THE ANATOMY OF A MARVEL REFRIGERATOR

01 Exclusive Cooling System

We locate all the mechanical components in a separate module above the refrigerated cabinet, providing more usable storage space with superior performance and easy installation and service. Since no bottom or back venting is required, design possibilities are almost endless.

02 Durable Metal Interior

Like a commercial refrigerator, every MARVEL is made with either a hygienic stainless steel or arctic white aluminum interior – so well built, it may well be the last refrigerator you ever buy.

03 Crescent Cube Ice Maker

The automatic ice maker supplies reliable production and storage of ice cubes that always taste fresh.

04 FreshFlo™ Freezer Shelves

These perforated shelves (in stainless steel or arctic white) are a MARVEL exclusive. This unique design facilitates cold air flow throughout the cavity, resulting in more even temperatures. Fully adjustable, these shelves are standard with all stainless steel or arctic white interior freezer models.

05 Roller Base

The roller base enables easy mobility of the refrigerator cabinet, while front-adjustable leveling legs allow both the front and rear legs to be adjusted while the refrigerator is in place, making installation a snap.

06 Daylight Interior Lighting

All refrigerators and freezers feature MARVEL's superior LED interior lighting – a cleaner, more modern looking white light that reduces dark areas and shadows.

07 Formed Metal Door Bins

Fully adjustable door bins are solid stainless steel or arctic white (to match interior), making them the strongest and longest lasting on the market.

08 Metal Framed Glass Shelving

Adjustable, tempered glass shelves are framed to match the interior, in either gleaming stainless steel or arctic white, providing unsurpassed strength and beauty.

09 More Usable Depth

We create more space by placing refrigeration components on top of the unit instead of inside the walls. This results in up to 20% more storage area than comparable products. With more usable capacity, models easily accommodate deeper items like beverage refrigerator packs, deli trays, and serving platters that other brands simply can't hold.

10 Clear-View Storage Bins

Our clear vegetable and fruit bins allow you to see what's stored without opening the bin, a definite time-saver.

All Freezer Columns

PICTURED: MODEL M18AF-WS

ALL-REFRIGERATOR & ALL FREEZER COLUMNS

These beautiful columns have the largest interior capacity on the market. Finished with either stainless steel or panel/overlay door, our all-refrigerator and all-freezer columns offer you interior choices of arctic white aluminum or gleaming stainless steel.

The all-refrigerator is also available with a glass door in two trim options: stainless or panel-ready. The all-freezer features an automatic ice maker. All columns have adjustable shelving and storage bins, daylight interior lighting, perforated FreshFlo™ stainless steel shelving, and the exclusive MARVEL cooling system.

If you prefer a separate refrigerator or freezer, these handsome columns deliver superior storage.

- All refrigerator columns available in 24", 30" and 36" widths.
- All freezer columns available in 18", 24", 30" and 36" models.
- Top freezer models available in 24", 30", and 36" models.

All-Freezer, Single Zone Wine Cooler and All Refrigerator

PICTURED: MODEL M24AF-SS, M24WC-BGX, M24AR-SS

WINE STORAGE MODELS

Your wine collection is a reflection of your good taste, so it is only fitting that such a prize investment be carefully and beautifully preserved. MARVEL offers a selection of undercounter and full-height wine storage refrigerators with up to a 98-bottle capacity.

Choose from single or dual-zone wine cellars. Both models feature our exclusive cooling system, which keeps each section at optimum temperature.

Each wine section has properly canted wine racks to keep corks moist and prevent sediments from resting at the bottom of bottles. Wine racks slide out for easy access. Like our refrigerator/freezers, our coolers are also available with stainless steel wrap or panel overlay and integrate beautifully with your MARVEL refrigerators, freezers, and your existing décor.

HUMIDRAWER™

Cigar enthusiasts will enjoy the optional Humidrawer™ cigar storage compartment, a self-contained humidor that preserves up to 200 cigars in four adjustable, Spanish cedar lined compartments. The drawer is finished and sealed to prevent interior moisture from escaping and the exceptionally solid drawer closure seals the humidified cigar chamber.

TOP FREEZER MODELS

This popular model is available in 24", 30" or 36" widths. Choose from an arctic white interior or gleaming stainless steel with tempered glass refrigerator shelves.

With an automatic ice maker, formed metal door bins, clear crispers for easy viewing, and durable easy-to-clean freezer and refrigerator shelves, our top freezer provides you with the best storage for your individual lifestyle. All freezers feature our FreshFlo™ stainless steel or arctic white shelving. Perforated and fully adjustable, the FreshFlo™ system facilitates cold airflow for more even temperatures. Door choices include stainless steel or panel/overlay to complement any décor.

Each model features our separate cooling system for superior performance and easy installation and service. Unlike typical refrigeration design, MARVEL's exclusive cooling system provides an exceptional frost free environment, reducing freezer burn.

Our Top Freezer offers more usable storage space than other brands. So there's room to store turkeys, birthday cakes, pizzas, and other large items.

Top Freezer Available in 24", 30" and 36" Models
