

RS36W80RUC1

Built-In Ice & Water Bottom Freezer Refrigerator

The family of DCS Integrated bottom freezer refrigerators provide a new level of fit and finish to deliver seamless kitchen integration. These are designed for easy installation and flush fit at heights of either 80" or 84" with minimal gaps. Choose between your cabinetry facades* or stainless steel door panel set (sold separately). *Water dispensing models can only use stainless steel door panel set (sold separately).

Features & Benefits

Real Integration

Contemporary kitchens are living spaces. Part of this evolution is increasingly refined design, flush fit cabinetry and appliances that enhance ergonomics as well as provide options to either showcase through crisp stainless steel (sold separately) or combine through custom panel finishes. Our integrated series is designed to be seamless. One of the challenges with freestanding refrigerators are the gaps required around and above to allow for door clearances and ventilation as well as unsightly protrusions from the cabinetry. The Integrated series minimizes gaps and fits flush to create consistent lines throughout your kitchen.

Simple Specification

We have worked with designers and architects around the world to understand the challenges of kitchen design. One of the biggest insights was developing a platform that makes design specification easier – from flush fit to uninterrupted cabinetry lines to easy optioning on paneling and handle choices. The Integrated series is accompanied by a digital design toolbox available on the DCS website to make the process easier.

Easy Installation

Whether it's an update to an existing kitchen or starting from scratch on a new design, product installation is key to a high quality look and feel. Integrated refrigerators are designed to do exactly that. There are multiple angles of adjustment for the door panels. The four feet can be adjusted from the front to easily allow for uneven doors. Adjustable door panels allow the fine-tuning of minimal gaps as kitchen cabinets settle after initial installation. Common sizing, clear installation guidelines and universal panel systems are tailored to provide the best possible fit and finish.

Designed to Match

Our bottom freezer models with both left and right opening handles allowing side by side placement if desired. Choose your own cabinetry facades* or stainless steel door panel set (sold separately). These Integrated refrigerators match the styling of our family of kitchen appliances including integrated ovens, CoolDrawer™ multi-temperature refrigerators and DishDrawer™ dishwashers.

Design Within Reach

We believe in designing quality products that deliver new levels of performance at the same time as providing great value. Up until now integrated refrigeration has been unattainable for many customers. The new DCS Integrated refrigerator series has been developed to set new benchmarks in design refinement, quality and value.

Fresher Food for Longer

A key ingredient in DCS refrigeration, ActiveSmart™ Foodcare helps keep your food fresher for longer by constantly monitoring how you use your fridge and adapting to maintain a controlled environment and optimum temperature.

Seamless Integration

The Integrated series minimizes gaps through heavy-duty inline hinges and adjustable doors enabling minimal gaps to create consistent lines throughout your kitchen. The series fits flush with cabinetry to reduce disruption and deliver design freedom through stainless or custom panel options.

Easy Cleaning

Removable, spill-safe cantilevered glass shelves are designed to contain drips and spills that can be simply wiped away, while leaving the interior walls completely smooth and easy to clean.

Flexible Living

These refrigerators adapt to suit your lifestyle by streamlining food preparation and organization with SmartTouch controls, flexible shelving and storage options, and slide out bins and trays. The water filter is easily accessible for quick cleaning or replacement. LED lighting in all compartments lights up all the shelves, bins and trays.

Efficient

These ActiveSmart™ refrigerators intelligently adapt to daily use to help save energy, cooling and defrosting only when they need to without compromising on food care.

Specifications

Accessories sold separately

Replacement water filter	Part number 81099
Set of 3 DCS metal handles (for custom made door panels)	Alternative square handle: AHV2-RS36W
