# WALLMASTER® SERIES THRU-THE-WALL AIR CONDITIONERS

**FRIEDRICH** 

1883

# WallMaster®

# Thru-the-wall Air Conditioners

# A perfect fit in Friedrich and Fedders A & B 27" sleeves

Select MODE, FAN SPEED, MONEY SAVER®, adjust TEMPERATURE and set the TIMER.

## **COMFORT & CONVENIENCE**

- New design makes controls more accessible
- Remote control
- 24-hour timer
- Smart Fan auto-adjusts fan speed to maintain desired temperature
- Check filter reminder
- 3-speed fan
- Auto restart
- Electronic defrost control
- Individually adjustable louvers direct the air flow where you need it
- Washable, antimicrobial filter

# **ENERGY MANAGEMENT**

- Money Saver® setting cycles the fan with the compressor
- ENERGY STAR® qualified models
- R-410A refrigerant

# **DURABILITY & QUALITY**

- Rotary compressor provides quiet, dependable performance
- Premium aluminum exterior grille
- Dense blower insulation blocks outdoor noise
- · Rifled copper tubing
- Impact resistant front cover
- High tech fins with sine wave lanced louvers increase energy efficiency by increasing surface area for heat exchange

#### **SAFETY & SECURITY**

- EntryGard™ anti-intrusion protection secures chassis to sleeve to deter 'kick-in' intrusion
- Power cord current leakage protected
- UL listed for safe operation
- Insect barrier

#### **INSTALLATION FEATURES**

- Mounts flush with the exterior wall for a neat appearance
- Ideal for thicker wall installations, where side fins don't fit
- Firm grip handles on the chassis for easy installation and removal from wall sleeve
- A direct replacement for 27" sleeves including Fedders A and B\*. Sleeve measures 27" W x 16 3/4" H

## **OPTIONAL ACCESSORIES**

- AG architectural grille for use with WSE sleeve
- Baffle adapter kit for use with deep sleeve installations (Fedders B sleeves)
- Drain kit for condensate disposal
- Internal drain kit for new construction applications where condensate drain system is built-in
- WSE sleeve ships with inside and outside steel weather panels and standard exterior grille

## ADJUSTABLE LOUVERS

<sup>\*</sup>Installation in Fedders B sleeve requires a baffle adapter kit-BAK.

# OPTIONAL ACCESSORIES

# WSE SLEEVE EXTERIOR GRILLES

## **Standard Grille**

Premium, expanded metal grille with powder coat paint. Ships with WSE sleeve.

Galvanized steel inner and outer weather panels also ship with sleeve.

# Optional Architectural Grille- AG

Premium extruded aluminum grille.

#### **IMPORTANT:**

Operating the air conditioner with incorrect rear grille or without Baffle Adapter Kit (on 19 3/4" deep sleeve) will recirculate discharge air and cause compressor overload to trip.

This will cause the unit to shut down temporarily and may lead to premature compressor failure.

#### **CORRECT Vertical Louvers**

#### **INCORRECT Horizontal Louvers**

## **WSE Wall Sleeve**

Ships with weather panels and grille. Sleeve is shown at right with standard galvanized steel inner panel, painted steel outer panel and standard grille.

Inner steel weather panel

WSE sleeve

Outer weather panel

Standard grille

# INSTALLATION ACCESSORIES

#### DK / Drain Kit

Installed at the back of the unit and allows for attachment to condensate disposal system, if necessary or desired.

#### IDK / Internal Drain Kit

New construction applications where a condensate drain system has been built into the wall interior.

#### BAK / Baffle Adapter Kit

Necessary when installing in a sleeve deeper than 16 3/4" deep, such as Fedders B sleeve (19 3/4" deep).

# CHASSIS DIMENSIONS

Heat Pump heating information (shown in red) indicates heat pump heating performance. Electric Heat heating information (shown in red) indicates electric heat strip performance. For Heat Pump electric heating performance refer to corresponding Electric Heat model.

HEATING PERFORMANCE: Change-over from heat pump operation to resistance operation on models indicated is automatic at a preset outside ambient temperature of approximately 35°F. Calculate the heat loss of the space to be heated. As long as the heat loss does not exceed the resistance heating capacity rating of the unit, the heating performance will be satisfactory.

Note: all models will produce condensate. If condensate disposal is desired, an optional drain kit is available.

DEFROST CONTROL: Initiated at 30°F (outdoor coil temperature) and terminated at 43°F (outdoor coil temperature). During defrost, the compressor stops and the electric heat starts, then operates with the fan to maintain indoor comfort. Below 43°F, the unit remains in electric heat mode.

DEFROST DRAIN: Drain automatically opens at approximately 50°F to prevent condensate from freezing inside drain pan.

Due to continuing research in new energy-saving technology, specifications are subject to change without notice.

As an ENERGY STAR® partner, Friedrich Air Conditioning Co. has determined that the selected ENERGY STAR® models meet the ENERGY STAR® guidelines for energy efficiency.

EER is the unit's Energy Efficiency Ratio; CEER is the unit's Combined Energy Efficiency Ratio.

Your energy costs will depend on your utility rates and use. The estimated energy cost is based on a electricity cost of \$ .12 per kWh. For more information, visit www.ftc.gov/energy.
