

Triple Stack Cook Combination

3x

Product Combo

Convenience

The DCS convection microwave reduces cooking times without sacrificing flavor and texture. 10 sensor settings and a sealed interior makes it easy to use and clean. Trim kit available for built-in models.

10 Cooking Functions

For everything from a quick pizza to a gourmet meal, plus a unique two-stage roasting function. A wide temperature range lets you safely proof breads and dehydrate meats, fruits and vegetables—or quickly (4,400W) broil or brown other foods.

Functional

Generous 4.0cuft capacity along with eight shelf positions with removable side racks to allow true multi-level cooking. Three halogen lights clearly illuminate the graphite enamel interior.

Temperature Control

A digital microprocessor monitors the temperature to ensure precise heat. Combined with our four-way convection system, this creates even heat distribution throughout the oven.

Warming Drawer

The warming drawer includes a removable shelf that creates enough space for six standard-size dinner plates.

Handle Option

DCS ovens and warming drawers come with a choice of two handle profiles—round or square.

Triple Stack Cook Combination

MICROWAVE

Power source	Electric
Watts	900
Convection Element (W)	1,450
Sealed Easy Clean Interior	•
Turntable System (in.)	14 $\frac{1}{4}$
