Ensure proper gas pipe sizing. Diameter and length of the supply pipe may limit the pressure and BTU delivery.

For outdoor use only. Do not build the grill into a combustible enclosure. Maintain at least 6 inches (153 mm) of clearance between the sides and back of the grill and any combustible surface, or use an insulating surround available from Kalamazoo. Never place the grill underneath an overhead combustible structure or surface. Do not place the grill in a location where the rear hood openings are likely to be exposed to a strong wind.

High altitude kit available.

Do not place the grill in a location where the rear hood openings are likely to be exposed to strong wind. A wind break wall is recommended for installations where the prevailing wind may be a problem.
