The manufacturer is constantly working to improve all types and models. Therefore, please be aware that we reserve the right to make changes to the shape, equipment and technology.

Symbol	Explanation
	Read instructions Please read the information in these instructions carefully to understand all of the benefits of your new appliance.

Symbol	Explanation
	Full instructions on the internet The detailed instructions are available via the QR code on the front of these instructions, at home.liebherr.com/fridge-manuals or by entering the service number at home.liebherr.com/fridge-manuals . The service number can be found on the serial tag <i>Fig. ()</i> .  <i>Fig. Example illustration</i>
	Check appliance Check all parts for transport damage. If you have any complaints, please contact your agent or customer service.
	Differences These instructions apply to a range of models, so there may be differences. Sections that apply to certain models only are indicated by an asterisk (*).
	Instructions and results Instructions are marked with a ►. Results are marked with a ▷.
	Installation videos Videos on installing appliances can be found on the Liebherr Domestic Appliances YouTube channel.

1 General safety instructions

- Read and follow these instructions. They contain safety advice which is important for safe and problem-free installation and operation. Always read and follow the safety advice.
- It is important that the guidelines and instructions in this manual are followed so that the appliance is correctly installed and operates properly. Read and understand all information in this manual before the appliance is installed.
- **Risk of child entrapment:**
Before you throw away your old refrigerator or freezer:
Take off the doors. Leave the shelves in place so that children may not easily climb inside.
- Only install, connect and dispose of the appliance in accordance with the instructions.

- The socket must be easily accessible so that the appliance can be disconnected from the mains quickly in an emergency. It must not be behind the back of the appliance.
- **IMPORTANT:** The power plug must be easily accessible so that the appliance can be disconnected from the mains quickly in an emergency. It must not be behind the back of the appliance.

	DANGER	indicates a hazardous situation, which if not avoided, will result in death or serious injury.
	WARNING	indicates a hazardous situation, which if not avoided, could result in death or serious injury.
	CAUTION	indicates a hazardous situation, which if not avoided, will result in minor or moderate injury.
	NOTICE	indicates a hazardous situation, which if not avoided, could result in damage to property.
	Note	indicates useful advice and tips.

2 Setup conditions

WARNING

Risk of fire due to moisture!

If live parts or the power cord get wet, this can cause a short circuit.

- The appliance is designed for use in enclosed spaces. Do not operate the appliance in open space or in damp areas or where there is spray.

Normal use

- Only set up and use the appliance in enclosed spaces.
- Only use once installed.

2.1 Space

WARNING

Leaking refrigerant and oil!

Fire. The refrigerant contained within the appliance is environmentally friendly, but flammable. The oil contained within the appliance is flammable. Escaping refrigerant and oil can ignite if they are of high enough concentration and are exposed to an external heat source.

- Do not damage the pipelines of the coolant circuit and the compressor.

- If the appliance is installed in a very damp environment condensate water may form on the outside of the appliance.

Always make sure the installation area is well ventilated. .

- The more refrigerant is in the appliance, the larger the room must be where the appliance is located. In the case of a leak, a flammable gas-air mixture may be created in a room that is too small. For every 0.28 oz (8 g) of refrigerant, the installation space must be at least 35.5 ft³ (1 m³). Specifications regarding the refrigerant contained within the appliance can be found on the rating plate inside the appliance.

2.1.1 Installation surface

- The floor of the installation site must be horizontal and level.
- If the floor is not completely even, level the cabinet with supports.

2.1.2 Installation position

- Do not install the appliance in direct sunlight or next to an oven, heater, or similar heat source.
- Only install the appliance in solid cabinets.

2.2 Setting up multiple appliances

NOTICE

Risk of damage caused by water condensate!

- Do not install this device directly beside another fridge/freezer compartment.

NOTICE

Risk of damage caused by water condensate!

- Do not stack the appliance directly on top of another.

These appliances are designed for different types of installation. Only combine appliances if the appliances are designed for this. The following table shows the installation options by model:

Setup type	Model
Single	All models
Side-by-Side (SBS)	Model that start with S... See the SBS setup for positioning.
Stacked	Models up to maximum recess height of 34-5/8 " (880 mm) and with heated top can be "stacked". Top appliance: to the max. recess height of 5-1/2 " (140 mm)

Fig. 1

Appliance dimensions

Install each appliance into its own recess.

2.3 Electrical connection

WARNING

Improper use!

Fire. If a power cable/plug comes into contact with the back of the appliance, the power cable/plug can be damaged by appliance vibrations and this may result in a short circuit.

- Install the appliance so that it does not touch any plugs or power cables.
- Do not connect any appliances to sockets in the area of the back of the appliance.
- Multi-sockets/power distributors and other electronic appliances (such as halogen transformers) may not be placed and operated at the back of appliances.

3 Appliance dimensions

Fig. 2

	in.	mm
A	22	559
B	21 1/2	546
C	69 11/16	1770
D	27 3/8	695

	in.	mm
E	5/8	15

Fig. 3

	in.	mm
A	22	559
B	21 1/2	546
C	69 11/16	1770

4 Recess dimensions

4.1 Internal dimensions

Fig. 4

	in.	mm
F	69 3/4 — 70 3/8	1772 — 1788
G	22 — 22 3/4	560 — 578
H	min. 21 5/8, recommended 22	min. 550, recommended 560
J	min. 19 11/16	min. 500
L	max. 3/4	max. 19

The specified energy consumption was determined with a kitchen unit depth of 22 in. (560 mm). The appliance will work properly at a kitchen unit depth of 21 5/8 in. (550 mm), but with a slightly higher energy consumption.

- Check the wall thickness of adjacent cabinets: It must be min. 5/8 in. (16 mm).
- Only install the appliance in solid, fixed kitchen cabinets. Ensure that the cabinets cannot tip over.
- Align the cabinets with a spirit level and a try square. If necessary, level them by putting something underneath them.
- Ensure that the floor and the side panels of the cabinet are at right angles to each other.

5 Ventilation requirements

NOTICE

Covered vents!

Damage. Appliance can overheat, which can reduce the service life of various parts of the appliance and lead to functional impairments.

- Always ensure good ventilation.
- Always keep vents or ventilation grills in the appliance housing and in the kitchen structure (built-in appliance) unobstructed.
- Never block air vents of the fan.

Comply with the ventilation gaps:

- The depth of the ventilation shaft on the back wall of the cabinet must be at least 1 1/2 in. (38 mm).
- At least 31 in.² (200 cm²) is required for the ventilation cross-sections below the unit at its base and above the unit in the surrounding cabinet.
- Basically, the larger the ventilation cross-section, the more efficiently the appliance will run.

Sufficient ventilation is required for the appliance to operate correctly. The pre-fitted vents ensure an effective air-flow cross-section on the appliance of 31 in.² (200 cm²). If you replace the vents with a cover panel, it must have at least an equal or larger air-flow cross-section than the manufacturer's vent.

6 Transporting the appliance

- Transport the appliance in its packaging.
- Transport the appliance upright.
- Do not move the appliance on your own.

7 Unpacking the appliance

If the appliance is damaged check with the supplier immediately before connecting it.

- Check the appliance and packaging for damage during transport. If you suspect any damage, please contact your supplier immediately.
- Remove all materials that could prevent it from being installed properly or prevent proper ventilation from the back or the side panels of the appliance.
- Remove all protective films from the appliance. Do not use sharp or pointed objects for this.
- Remove the mains cable from the back of the appliance. Also remove the cable holder, otherwise there will be vibration noise!

8 Setting up the appliance

CAUTION

Risk of personal injury!

- Have two people move this appliance into place.

Disposal of packaging

WARNING

Unstable appliance!

Risk of injury and damage. The appliance can tip over.

- Secure the appliance according to the operating instructions.

WARNING

Danger of fire and damage!

- Do not place devices that give off heat, e.g. microwaves, toasters, etc. on the appliance.

If possible, have a professional install the appliance in your kitchen cabinet unit.

Do not install the appliance without assistance.

8.1 After setup

- Remove all transport packaging.

Fig. 5*

- Remove the red transport safety device.

- Clean the appliance (see User Guide, Cleaning the appliance).
- Write down the type (model, number), appliance name, appliance/serial number, date of purchase and dealer address in the designated fields (see User Guide, About the appliance).

9 Disposal of packaging

WARNING

Danger of suffocation from packaging materials and films!

- Do not allow children to play with packaging materials.

The packaging is made from recyclable materials:

- Corrugated card/cardboard
- Parts made of foamed polystyrene
- Films and bags from polyethylene
- Packing bands from polypropylene
- Wood frame nailed together with a polyethylene window*

- Take the packaging material to an official collection point.

10 Explanatory symbols used

	There is the risk of injury when doing this! Obey the safety instructions!
	These instructions apply to several models. Only perform this step if it applies to your appliance.
	To install, please follow the detailed description in the Guide.
	This section applies either to a single-door appliance or a double-door appliance.
	Choose one of the options: Appliance with right-hinged door or appliance with left-hinged door.
	Installation step necessary with IceMaker and/or InfinitySpring.
	Loosen or tighten screws slightly.
	Tighten the screws fully.
	Check to see if the next step applies for your model.
	Check the components are in correctly.
	Measure the specified measurement and adjust if necessary.
	Installation tool: Meter stick

		Tool for assembly: Cordless screwdriver and attachments
		Tool for assembly: Spirit level
		Tool for assembly: Size 7 and size 10 spanner
		Two people are required for this step.
		This step takes place at the selected location of the appliance.
		Aid for assembly: String
		Aid for assembly: Square
		Aid for assembly: Screwdriver
		Aid for assembly: Scissors
		Aid for assembly: Non-permanent marker pen
		Accessory kit: Remove components
		Dispose of components that are no longer needed.

11 **** freezer compartment door

The **** freezer compartment door can be easily moved whenever changing the door hinge. If the door of the refrigerator can be opened more than 115° (1), the freezer compartment can also be opened without changing the hinge. If the opening angle (2) of the appliance door is less than this, the door hinge must be repositioned.

Fig. 6

11.1 Moving the door hinge

The slider for moving the door hinge is located on the back of the **** freezer compartment door at the bottom.

Fig. 7

- Close the **** freezer compartment door (1).
- Grab the **** freezer compartment door from below.
- Slide the slider (2) either to the right or to the left.

12 Reversing the door

Tool

Fig. 8

Reversing the door

NOTICE

Live parts

Damage to electrical parts

- Before changing the door hinge, disconnect the plug at the mains.

Fig. 9

- Removing the soft stop damper: Remove the soft stop damper from the ball stud (1). Unscrew the retainer (2). Remove the ball stud with a screwdriver (3).

Fig. 10

- Remove covers.

Fig. 11

- Loosen the screws on **all** hinges but do not remove them.

Fig. 12

- Remove the door: Push the door forward and then out, unhook it and put it to one side.

Fig. 13

- Unscrew all hinges and set aside together with the screws.

Fig. 14

- Loosen and shift the bracket at the top and bottom of the door. The bracket must be shifted so you can screw on the hinges.

Reversing the door

Fig. 15

- Shift the screws to fasten the hinge. Do not screw tightly after shifting – you need to hang the hinges later.

Fig. 16

- Swap the fixing bracket to the opposite side.

Fig. 17

- Turn all hinges 180° to the opposite side and screw firmly.

Fig. 18

- Refitting the door: Hang the door with its hinges and tighten the screws.

Fig. 19

- Refit the closing dampers: Screw in the ball studs (1), tighten the bracket (2), and hang the closing dampers in the ball studs.
- Check all screws and retighten if necessary.

Fig. 20

- Reassemble the bottom and center cover. Only replace the remaining covers after installing the appliance back into the cabinet.

Water connection*

13 Water connection*

WARNING

Electricity and water!
Electric shock

- ▶ Before connecting to the water hose: Disconnect the appliance from the mains.
- ▶ Before connecting to water lines: Shut off the water supply.
- ▶ The drinking water connection may only be carried out by a qualified gas and water installer.

WARNING

Contaminated water!
Poisoning.

- ▶ Connect to potable water supply only.

The appliance's water connection and inlet solenoid valve are suitable for a water pressure of up to 1 MPa (10 bar).
Specifications for proper operation (flow rate, ice cube size, noise level):

Water pressure		
bar	psi	MPa
1.5 to 6.2	21.76 to 87.02	0.15 to 0.62

Water pressure if using the water filter:		
bar	psi	MPa
2.8 to 6.2	40 to 90	0.28 to 0.62

If the pressure exceeds 0.62 MPa (6.2 bar): Activate the pressure reducer first.

Ensure that the following conditions are met:

- ☐ Water pressure is maintained.
- ☐ Water is supplied to the appliance via a cold water pipe that can withstand the operating pressure and is connected to the drinking water supply.
- ☐ Use a **1/4" OD copper pipe** to connect the water supply to the solenoid valve. **This is not supplied with the appliance.**
- ☐ A connector between the R3/4 connection thread and the 1/4" OD copper cable is supplied with the appliance.
- ☐ There is a filter with a seal in the copper pipe connector. The filter with a seal is included in the scope of delivery.
- ☐ There is a stopcock between the copper pipe and the domestic water connection in order to be able to cut off the water supply if necessary.
- ☐ The stopcock is located outside the back of the appliance and is easily accessible so that the appliance can be far back as possible and the valve can be turned on

quickly, if necessary. Distance dimensions are adhered to.

- ☐ All equipment and devices used for the water supply comply with the applicable regulations of the country of use.
- ☐ The rear of appliance is accessible so that you can connect the appliance to the drinking water supply.
- ☐ Do not damage or buckle the hose when setting it up.

14 Connect the water supply*

Fig. 21

Connect the coupler to the appliance

- ▶ Remove the cap Fig. 21 (1) from the solenoid valve Fig. 21 (2).
- ▶ Insert the coupler Fig. 21 (3) into the union nut Fig. 21 (4).

NOTICE

Improper installation of the water filter Fig. 21 (5)!
Damage to the water filter.

- ▶ Insert the filter with the recess pointing towards the coupler.

- ▶ Insert the water filter Fig. 21 (5) with the recess pointing down towards the coupler Fig. 21 (3).

NOTICE

Overtightened union nut!
Damage to the thread.

- ▶ Screw the union nut manually on to the thread until it is tight and secure.

- ▶ Attach the union nut Fig. 21 (4) to the solenoid valve Fig. 21 (2) and tighten.

Water connection at 90°: Connect the water hose to the angle piece

- ▶ Screw on the angle piece Fig. 21 (6).
- ▶ Connect the water hose Fig. 21 (7) (e.g. copper) to the angle piece Fig. 21 (6) using the clamp ring Fig. 21 (8) and nut Fig. 21 (9).
- ▶ Attach the water hose Fig. 21 (7) to the housing if possible, using the clip bracket.

Straight water connection: Connect the water hose to the connecting piece

- ▶ Put the angle piece Fig. 21 (6) to the side.

Fit the appliance into the recess

- ▶ Connect the water hose *Fig. 21 (7)* (e.g. copper) to the connecting piece *Fig. 21 (3)* using the clamp ring *Fig. 21 (8)* and nut *Fig. 21 (9)*.
- ▶ Attach the water hose *Fig. 21 (7)* to the housing if possible, using the clip bracket.
- ▶ Connect the water hose to the stopcock.

Checking the water system

- ▶ Slowly open the mains stopcock of the water supply.
Before installing in the recess:
- ▶ Check the entire water system for leaks.

Venting the water system

The system should be vented in the following situations:

- Initial commissioning
- Changing the InfinitySpring water tank

Make sure that the following requirements are fulfilled

- Appliance is fully installed and connected
- Water tank is inserted (see User Guide, Maintenance)
- Water filter is inserted (see User Guide, Maintenance)
- Appliance is on
- ▶ Open the appliance door
- ▶ Take a glass and press it against the lower part of the InfinitySpring dispenser.
- ▷ The top section moves out and air or water is dispensed into the glass.
- ▶ Continue the process until a steady flow of water pours into the glass.
- ▷ There is no more air in the system.
- ▶ Clean the IceMaker (see User Guide, Maintenance).
- ▶ Clean the InfinitySpring (see User Guide, Maintenance).

Supplied installation parts

Fig. 22

15 Fit the appliance into the recess

Tool

Fit the appliance into the recess

Fig. 23

Fig. 24

Fig. 25

- Separate the floor mounting bracket Fig. 25 () at the perforation.

NOTICE

Correct installation depth of the appliance.

- Using the mounting bracket ensures the correct installation depth of the appliance.

Fig. 26

- Screw the mounting brackets on the left and right of the recess floor, flush to the side wall.

Fit the appliance into the recess

Fig. 27

- Remove the power cable from the package and plug it into the back of the appliance. Use a cable lug to lay the power plug cord to the accessible socket.

Fig. 28

- If necessary, install the water connection at this point, following the instructions in the User Guide.

Fig. 29

- Insert the adapter panel on the top of the appliance. The panel can be moved to both sides.

Fig. 30

- Slide the appliance 2/3 of the way into the cabinet recess.

Fig. 31

- Assemble the mounting bracket. Attach the mounting brackets to align with the cabinet door handles. If the door is large use four mounting brackets in total. After assembly, fold the covers onto the bracket.

Fig. 32

- Check whether the unit side wall is 5/8 in. (16 mm) or 3/4 in. (19 mm) thick.

Fit the appliance into the recess

Fig. 33

- For unit walls which are 5/8 in. (16 mm) thick: Clip a spacer on all hinges. No spacer is required if the unit walls are 3/4 in. (19 mm) thick.

Fig. 34

- Use a screwdriver to loosen the cover at the top left and then remove it.

Fig. 35

- Loosely screw on the mounting bracket. The bracket should still be easy to move.

Fig. 36

Fig. 37

- Now insert the appliance all the way into the unit recess. The adjustable feet must rest in the recesses in the brackets on both sides.

Fig. 38

- Remove the floor mounting bracket stopper. Loosen the stopper by moving it and, if necessary, pull it off with the help of pliers.

Fit the appliance into the recess

Fig. 39

- Check that the appliance is flush in the cabinet recess. The mounting bracket must be attached to the side wall of the cabinet recess.

Fig. 40

- For unit side walls which are 5/8 in. (16 mm) thick, the spacers fit against the unit recess on the hinge side.

Fig. 41

- For unit side walls which are 3/4 in. (19 mm) thick, the front sides of the hinges are positioned flush against the front of the unit side wall.

Fig. 42

- If necessary, level the appliance using the adjusting feet.

Fig. 43

- Screw on the appliance on the hinge side.

Fig. 44

- Move the bracket so it sits flush on the side wall of the cabinet recess. Tighten all the screws firmly.

Fit the appliance into the recess

Fig. 45

- Remove the stop from the bracket on the handle side and dispose of it.

Fig. 46

- Place the cover.

Fig. 47

- Move the cover panel so it sits flush on the side of the cabinet wall.

Fig. 48

- The trim is magnetic. Place the trim below the top cover and press. If necessary, shorten the trim to the required length with a sharp pair of scissors.

Fig. 49

The height adjustment is only supplied as standard for recess heights of .55 1/8 in. (140 cm) and above. It is used for sound optimization. Both parts of the height adjustment are included in the accessory kit.

- To stabilize the appliance at the back underneath: Fit the handle onto the rail of the height adjustment and push the rail into the appliance base. Remove the handle and do the same with the second rail.

Fig. 50

- Close the door and check the preset of 5/16 in. (8 mm) from the upper edge of the appliance door to the cross-piece support

Fit the appliance into the recess

Fig. 51

- Push up mounting aids to the height of the cabinet door. Bottom stop edge of the fitting aid = top edge of the door to be fitted.

Fig. 52

- Undo the counter nuts and remove the crosspiece.

Fig. 53

- Center-align the crosspiece on the inside of the cabinet door.

Fig. 54

- Fix the crosspiece using at least 6 screws for chipboard doors and at least 4 screws for panel doors.

Fig. 55

- Remove the fitting aids, turn round and insert into the adjacent opening.

Fig. 56

- Clip the cover on the crosspiece on the handle side.

Fit the appliance into the recess

Fig. 57

- Attach the unit door and loosely screw the lock nuts onto the adjusting bolts.

Fig. 58

- Align the unit door in the X and Y direction using the adjusting bolts.

Fig. 59

- Screw on the lock nuts and check the height.

Fig. 60

- Check the gap between the door and the surrounding custom panels. For unit fronts thicker than 3/4 in. (19 mm), take account of the dimensions and advice in the **Unit fronts** chapter.

Fig. 61

- Open the cover to fit the mounting bracket on the custom panel. Align the front edge of the mounting bracket parallel with the custom panel edge and screw the bracket down tightly. Fold up the cover.

Fig. 62

Align the unit door in the Z direction:

- Loosen the adjusting screw on the crosspiece and the screw on the mounting bracket.
- Move the door.

Fig. 63

- Check the gap between the custom panel and the unit body.
- Check all screws and retighten them if necessary.

Fig. 64

- Clip the top cover on.

Fig. 65

- Cut the tread to size and place between the front of the cabinet and the door.

Check the following points to ensure the appliance is correctly installed. Otherwise, ice and condensation may form, and malfunctions may occur:

- ▷ The door must close properly.
- ▷ The unit door must not touch the body of the unit.
- ▷ The seal on the upper corner on the handle side must be fitted securely.

16 Cabinet fronts

16.1 Dimensions

Depending on your model, you will need one or two cabinet doors. The size of the cabinet door(s) depends on the overall recess size and cabinet unit thickness.

Note

Observe the appliance and recess dimensions and follow the installation diagrams (see 3 Appliance dimensions) (see 4 Recess dimensions) . See the relevant catalog for the installation diagrams.

General requirements:

- Please refer to our catalogs for appliance-specific recommendations on size and weight for fixed door installations.
- The cabinet unit thickness should be at least 5/8 " (16 mm) and no bigger than 3/4 " (19 mm).
- When mounting a 2-door cabinet door, observe the recommended clearance.

Fig. 66 Clearances for a 2-door cabinet door

Recess height	Appliance height (A) (in.)	Distance (B) (in.)	Clearance (C) fixed door (in.)
178-2 drawers	69–11/16	19/32	21-39/64 + 19/32
178-3 drawers	69–11/16	19/32	27-3/8 + 19/32

Cabinet fronts

Other cabinet door above, below or next to it:

- Vertical gap between cabinet doors must be 3/16 " (4 mm).
- Horizontal gap between cabinet doors must be 3/16 " (4 mm). Check the collision factors here (see 16.3 Setting the clearance to avoid collision) .

Weight and hinges:

- Heavy cabinet fronts increase the stress on the hinge. The hinge may be damaged. As such, refer to the catalog for the maximum weight specification for your appliance.
- If the cabinet front exceeds the maximum permitted weight, an appliance with door-tracking device can help by loading the weight over several concealed hinges on the cabinet.
- If you have long cabinet fronts that protrude a long way above the appliance, we recommend an additional door hinge (e.g. Kamat), which by design has the same pivot point as the fixed door hinge used by Liebherr appliances. Using an additional hinge (Kamat) loads the weight over multiple points. We recommend using a milled adapter fitting for high cabinet fronts to counteract any dragging (convex/concave).

16.2 Mounting the cabinet front(s)

When installing, note:

- Cabinet front must be installed symmetrically to the refrigerator door.
- Adjoining cabinet front is exactly level.
- Adjoining cabinet front has the same edge radius as the front of the appliance.
- Cabinet front is flat and tension-free.
- Cabinet front is adjusted to a minimum depth of approx. 1/16 " (2 mm) to the unit body.
- Fit the appliance into the recess (see 15 Fit the appliance into the recess) .
- Attach the cabinet front to the appliance door (see 15 Fit the appliance into the recess) .
- Check the cabinet front does not collide with anything (see 16.3 Setting the clearance to avoid collision) .

16.3 Setting the clearance to avoid collision

After installing the cabinet front(s), check that the cabinet fronts do not collide.

Fig. 67

- (1) Front thickness (FD) (3) Clearance size (S)
(2) Edge radius (R)

	R (2) = 0 in.		R = 3/64 in.		R = 5/64 in.		R = 1/8 in.	
FD (1) (in.)	G _{min}	G _{max}	G _{min}	G _{max}	G _{min}	G _{max}	G _{min}	G _{max}
1/64	1/32	0	1/64	0	1/64	0	1/64	0
1/32	3/32	1/64	1/16	1/64	1/8	0	1/32	1/32
5/64	11/64	1/16	9/64	3/64	1/8	1/32	7/64	7/64
9/64	1/4	1/8	7/32	3/32	7/32	5/64	3/16	3/16
7/32	21/64	13/64	5/16	11/64	19/64	5/32	17/64	17/64
19/64	27/64	9/32	13/32	17/64	25/64	1/4	3/8	3/8

Fig. 68 Table of min./max. clearances

G_{min} = min. clearance in inches

G_{max} = max. clearance in inches

Note

When making adjustments, always make sure that the cabinet front suits the general appearance.

Check the collision factors and adjust them accordingly:

- Determine the front thickness and edge radius.
- Refer to the table for the min./max. clearance dimensions.
- Check the clearance size against the table.
- Do one of the following depending on the measured clearance size.

Clearance size	Description
S > G _{max}	If the clearance size is greater than the two limits, you do not need to make any adjustments.

Clearance size	Description
$S < G_{\min}$	If the clearance size is below the limits, you must increase it. Another option is to increase the edge radius.
$G_{\min} \leq S \leq G_{\max}$	If the clearance is between the two limits, you have to be careful. This will quickly lead to collisions.

17 Water tank

Depending on your model, the InfinitySpring water tank is behind the lowest drawer in the fridge or BioFresh compartment

17.1 Inserting the water tank

Fig. 69

- ▶ Remove the drawer.
- ▶ Insert the water tank and turn approx. 90° to the right until it engages.
- ▶ Check that the water tank is sealed and no water leaks out.
- ▶ Insert the drawer.
- ▶ Vent the water system (see Installation Instructions, Water Connection)

Instead of the water filter, you can use an additional water tank.

Note

The water tank is available as a spare part.

18 Water filter

Depending on your model, the water filter is behind the lowest drawer in the fridge or BioFresh compartment.

It absorbs deposits in the water and reduces the taste of chlorine.

- Replace the water filter at least every 6 months under the specified usage conditions or if the flow rate drops significantly.
- The water filter contains carbon and can be disposed of with the regular household waste.

Note

You can purchase the water filter from the [Liebherr household appliance store](http://home.liebherr.com) (home.liebherr.com).

18.1 Installing the water filter

Fig. 70

Make sure that the following conditions are met:

- Water pressure is maintained (see Installation Instructions, Water Connection).
- ▶ Remove the drawer.
- ▶ Insert the water filter and turn clockwise approx. 90° until it engages.
- ▶ Make sure the filter does not leak and no water is coming out.
- ▶ Insert the drawer.

CAUTION

New water filters may contain particulate matter.

- ▶ Dispense 101.44 fl oz (3 l) of water through the InfinitySpring and pour away.

▷ The water filter is now ready for use.

19 Connecting the appliance

WARNING

Incorrect connection!

Risk of fire.

- ▶ Do not use an extension cord.
- ▶ Do not use a multipoint connector strip.

Connecting the appliance

NOTICE

Incorrect connection!

Damage to the electronics.

- ▶ Do not connect the appliance to a stand-alone inverter, e.g. solar power systems and petrol generators.
- ▶ Do not use an energy saving plug.

Note

Only use the mains cable supplied.

- ▶ A longer mains cable can be ordered from Customer Service.

Make sure that the following requirements are fulfilled:

- The type of current and voltage at the installation site complies with the information on the serial tag .
- The socket is grounded and fused in accordance with regulations.
- The tripping current for the fuse is between 10 and 16 A.
- The socket is easily accessible.
- ▶ Check the electrical connection.
- ▶ Connect the mains plug to the power supply.
- ▷ The Liebherr logo appears on the screen.
- ▷ The display switches to the standby symbol.
